**Generating Learning Opportunities** Gloria Ann Redding,2018-04-04 Glo is a remarkable Southern-born girl who will permit you a close-up and transparent view of her life story. Glo's parents did not graduate from high school, but she gleaned something special from them that wasn't found in a textbook. She discovered a priceless connection between family values, actions, and academic achievement. Glo candidly offers perspectives and strategies from her life journey, personal parenting, academic endeavors, and professional career. Her path included a disconnected and abusive father, five children sharing one bed, a roach infestation, and multiple academic distractions. Yet she always had a loving and supportive family, tribe, community, and mother who strongly and consistently advocated for her family. The goal of this book is to help guide families, parents, caregivers, educators, and communities through practical and relevant tips toward building strong foundations that result in phenomenal life outcomes. Glo invites you to find your place among these pages a place that resonates deeply within and propels you to take action in your own life and perhaps in the life of someone else too. May your destiny always lead toward generating learning opportunities.

*Creating Inclusive Learning Opportunities in Higher Education* Sheryl E Burgstahler,2020-12-08 In *Creating Inclusive Learning Opportunities in Higher Education*, Sheryl Burgstahler provides a practical, step-by-step guide for putting the principles of universal design into action. The book offers multiple ways to access, engage with, and transform the higher education environment: making physical spaces welcoming to students of all abilities; creating digital learning and assistive technology programs that meet the needs of all users; developing universal design in higher education (UDHE) syllabi, assessments and teaching practices that minimize the need for academic accommodations; and institutionalizing universal design supports and services. A follow-up to *Universal Design in Higher Education*, Burgstahler's new book will be a valuable resource for leaders, faculty, and administrators who are interested in acquiring the tools needed to create barrier-free learning environments. Filled with applications, examples, recommendations, and above all, a framework in which to conceptualize UDHE, this volume will help educators meet the design needs of all students and honor the principles of diversity and inclusivity.

**Enrichment Opportunities for Gifted Learners** Julia Link Roberts,Julia L. Roberts,2005 From a mentorship with a local archaeologist, to a medieval festival, the opportunities for gifted learners to explore a topic in depth are too numerous to mention. This book offers an introduction to structuring enrichment activities that add depth and complexity to a gifted child's learning experience. Enrichment provides students with opportunities to extend learning, Dr. Roberts, the book's author, explains. There are three primary purposes for enrichment: fostering interest; nurturing talent, developing expertise, or both; and increasing achievement. This book shows teachers how to provide meaningful enrichment experiences for gifted students. The book offers effective strategies for enriching the curriculum and creating in-depth learning experiences both in and out of the classroom. This is one of the books in Prufrock Press' popular Practical Strategies Series in Gifted Education. This series offers a unique collection of tightly focused books that provide a concise, practical introduction to important topics concerning the education of gifted children. The guides offer a perfect beginner's introduction to key information about gifted and talented education. Educational Resource

**Amplifying the Curriculum** Aída Walqui,George C. Bunch,2019 This book presents an ambitious model for how educators can design high-quality, challenging, and supportive learning opportunities for English Learners and other students identified to be in need of language and literacy support. Starting with the premise that conceptual, analytic, and language practices develop simultaneously as students engage in disciplinary learning, the authors argue for instruction that amplifies—rather than simplifies—expectations, concepts, texts, and learning tasks. The authors offer clear guidance for designing lessons and units and provide examples that demonstrate the approach in various subject areas, including math, science, English, and social studies. This practical resource will guide teachers through the coherent design of tasks, lessons, and units of study that invite English Learners (and all students) to engage in productive, meaningful, and intellectually engaging activity. “This book offers the most detailed guide available for designing instruction for students categorized as ELLs. Theoretically grounded and informed by years of implementation and study, this work is without equal in the field. I recommend the book enthusiastically as required reading in all teacher preparation programs.” —Guadalupe Valdés, Bonnie Katz Tenenbaum Professor of Education, Stanford Graduate School of Education “Reflecting its title, this book is an amplification of what it means to provide the best learning opportunities for English Language learners. Drawing on classroom-based research, *Amplifying the Curriculum* offers many practical examples of intellectually engaging units and tasks. This innovative book belongs on the bookshelves of all teachers.” —Pauline Gibbons, UNSW Sydney “This timely book is a call to educators across the nation to integrate language, literacy, and disciplinary knowledge to improve the education of our new American students.” —Tatyana Kleyn, The City College of New York

Learning Spaces Diana Oblinger,2006 El espacio, ya sea físico o virtual, puede tener un impacto significativo en el aprendizaje. *Learning Spaces* se centra en la forma en que las expectativas de los alumnos influyen en dichos espacios, en los principios y actividades que facilitan el aprendizaje y en el papel de la tecnología desde la perspectiva de quienes crean los entornos de aprendizaje: profesores, tecnólogos del aprendizaje, bibliotecarios y administradores. La tecnología de la información ha aportado capacidades únicas a los espacios de aprendizaje, ya sea estimulando una mayor interacción mediante el uso de herramientas de colaboración, videoconferencias con expertos internacionales o abriendo mundos virtuales para la exploración. Este libro representa una exploración continua a medida que unimos el espacio, la tecnología y la pedagogía para asegurar el éxito de los estudiantes.

*Measuring Access to Learning Opportunities* Committee on Improving Measures of Access to Equal Educational Opportunity,Timothy Ready,2003-05-29 Since 1968 the Elementary and Secondary School Civil Rights Compliance Report (known as the E&S survey) has been used to gather information about possible disparities in access to learning opportunities and violations of students' civil rights. Thirty-five years after the initiation of the E&S survey, large disparities remain both in educational outcomes and in access to learning opportunities and resources. These disparities may reflect violations of students' civil rights, the failure of education policies and practices to provide students from all backgrounds with a similar educational experience, or both. They may also reflect the failure of schools to fully compensate for disparities and current differences in parents' education, income, and family structure. The Committee on Improving Measures of Access to Equal Educational Opportunities concludes that the E&S survey continues to play an essential role in documenting these disparities and in providing information that is useful both in guiding efforts to protect students' civil rights and for informing educational policy and practice. The committee also concludes that the survey's usefulness and access to the survey data could be improved.

**Real Learning Opportunities at Business School and Beyond** Peter Daly,David Gijbels,2009-09-30 This is the 2009 volume in the *Advances in Business Education & Training Book Series*. The Series aims to foster advancement in the field and to serve as an international forum for scholarly and state-of-the-art research and development. This volume offers challenging thoughts on

constructing meaningful learning both within the academy and in collaboration with outside stakeholders. It comprises two major sections: research into business education and best practice in business education. The research contributions explore the incorporation of theoretical frameworks and the exploitation of clicker technology in classroom practice, the integration of reflective writing into work placements to support learning, the exposure of ideas about morally leading change and its impact on leadership aspirations, large group business learning, self-theories, goal orientations and achievement motivations, and Chinese students' perceptions of intercultural competence in tutors. Other research contributions look beyond the business school to explore entrepreneurs' perceptions of their existing business model. The best practice contributions discuss master thesis supervision, MBA study tours designed to increase global exposure, the use of authentic learning materials in career writing courses, and cross cultural innovations.

**Expanded Learning Time and Opportunities** Helen Janc Malone,2011-10-25 Expanding the learning day is gaining national momentum as an important school-improvement and whole-child development strategy. This issue focuses on school-community partnerships that provide a seamless, longer learning day that best meets the academic (Expanded Learning Time or ELT) and developmental (Expanded Learning Opportunities or ELO) needs of high-poverty students in resource-poor communities. First it draws attention to the importance of ELOs and offers contours of the ELT-ELO partnerships through research evidence and policy analysis. It then covers both in practice and features a spectrum of ELT-ELO partnerships, from less to more integrated models. The issue pays close attention to: The central role ELOs play in ELT schools The changing safeguards for community-based organizations Ways in which current education policy is shaping the approach of schools and community partners to learning and development. This is the 131st volume of New Directions for Youth Development, the Jossey-Bass quarterly report series dedicated to bringing together everyone concerned with helping young people, including scholars, practitioners, and people from different disciplines and professions.

*Learning Through Citizen Science* National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Board on Science Education,Committee on Designing Citizen Science to Support Science Learning,2018-12-28 In the last twenty years, citizen science has blossomed as a way to engage a broad range of individuals in doing science. Citizen science projects focus on, but are not limited to, nonscientists participating in the processes of scientific research, with the intended goal of advancing and using scientific knowledge. A rich range of projects extend this focus in myriad directions, and the boundaries of citizen science as a field are not clearly delineated. Citizen science involves a growing community of professional practitioners, participants, and stakeholders, and a thriving collection of projects. While citizen science is often recognized for its potential to engage the public in science, it is also uniquely positioned to support and extend participants' learning in science. Contemporary understandings of science learning continue to advance. Indeed, modern theories of learning recognize that science learning is complex and multifaceted. Learning is affected by factors that are individual, social, cultural, and institutional, and learning occurs in virtually any context and at every age. Current understandings of science learning also suggest that science learning extends well beyond content knowledge in a domain to include understanding of the nature and methods of science. Learning Through Citizen Science: Enhancing Opportunities by Design discusses the potential of citizen science to support science learning and identifies promising practices and programs that exemplify the promising practices. This report also lays out a research agenda that can fill gaps in the current understanding of how citizen science can support science learning and enhance science education.

**Measuring Access to Learning Opportunities** National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Center for Education,Committee on Improving Measures of Access to Equal Educational Opportunity,2003-06-28 Since 1968 the Elementary and Secondary School Civil Rights Compliance Report (known as the E&S survey) has been used to gather information about possible disparities in access to learning opportunities and violations of students' civil rights. *Enhancing Learning Opportunities Through Student, Scientist, and Teacher Partnerships* Farland-Smith, Donna,2021-03-05 Student-scientist-teacher interactions provide students with several advantages. They provide opportunities to interact with experts and professionals in the field, give students a chance at meeting a role model that may impact students' career choices, and increase awareness of available career options combined with an understanding of how their skills and interests affect their career decisions. Additionally, it enhances attitudes and interest toward STEM professions for students and grants opportunities to connect with scientists as human beings and see them as real people, replacing stereotypical perceptions of scientists. Moreover, there are many advantages for the teacher or informal educator when these partnerships are established. For these reasons and more, numerous studies are often conducted involving the partnerships of students, scientists, and teachers. Enhancing Learning Opportunities Through Student, Scientist, and Teacher Partnerships organizes a collection of research on student-scientist-teacher partnerships and presents the models, benefits, implementation, and learning outcomes of these interactions. This book presents a variety of different scientist-student-teacher partnerships with research data to support different learning outcomes in settings like schools, after-school programs, museums, science centers, zoos, aquariums, children's museums, space centers, nature centers, and more. This book is ideal for in-service and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in research on beneficial student-scientist-teacher partnerships/models in formal and informal settings.

**Improving Opportunities to Engage in Learning** Nalita James,Hugh Busher,2018-05-20 Improving Opportunities to Engage in Learning investigates the experiences of mature adult learners returning to formal education. The book challenges the policy discourses in which Access to Higher Education survives by suggesting that continuing education is more about determination by students to alter their identities and career opportunities than meeting narrow performative criteria of financial targets. Chapters explore students’ struggles with institutional and social structures in the current political and socio-economic climate, before identifying how the transformation of their learner identities is facilitated in the courses by collaborative cultures and supportive tutors. The book addresses a research gap in knowledge about students’ and tutors’ experiences of Access to Higher Education courses, presenting a broad perspective on the importance and difficulties of such courses through listening to the voices of students and tutors undertaking a variety of Access to HE pathways. The authors argue that despite success on their courses benefiting the national economy as well as students individually, the social and financial costs of continuing education is almost entirely shifted onto students’ shoulders by policymakers. Despite the costs, students can still see Access to HE as a chance to improve their lives, reflecting the neoliberal discourse of personal responsibility and risk embedded in broader national social and policy discourses. Improving Opportunities to Engage in Learning will be of great interest to researchers, academics and postgraduate students in the fields of further and higher education, widening participation, social justice and sociology of education, and education policy and politics.

**Fostering Sustained Learning Among Undergraduate Students: Emerging Research and Opportunities** Chemosit, Caroline,Rugutt, John,Rugutt, Joseph K.,2017-03-03 Keeping students engaged and receptive to learning can, at times, be a challenge. However, by the implementation of new methods and pedagogies, instructors can strengthen the drive to learn among their students. **International Perspectives on Literacies, Diversities, and Opportunities for Learning** Cynthia Brock,Beryl Exley,Lester-Irabinna Rigney,2023-07-11 This book explores the conceptual framework, opportunities for learning, as a transaction between literacy learners, mediating agents, and the literacy content to be learned within social, cultural, and historical contexts. With contributions from top scholars from around the world, the chapters in this book provide a window into the varied ways learners, their families, educators, and researchers have co-constructed opportunities for learning in a range of PK-12 classrooms, community settings, and university classrooms across the globe. Building on decades of existing scholarship, contributors conceptualize literacy as social practice and discuss a variety of literacies—including engineering literacies, community literacies, and bilingual and multicultural literacies and more—through real-world and insightful examples. By situating literacy learning in the complex social, cultural, and historical contexts in which students, teachers, and families live and work, chapter authors provide nuanced, qualitative, and deeply profound views of literacy learning. Critical and informative, with a myriad of examples on co-constructed opportunities for learning, this volume is an essential text for graduate courses on literacy education, and for literacy researchers, teacher educators, and teachers.
