Integrated Population, Health and Environment Programs in Ethiopia

Fri, April 12
2:00 – 3:30 pm
Wolfe Street Building
Room W3030
(JHU East Baltimore campus)
Followed by a social hour

Presented by Dr. Peter Winch
Professor and Director, Social and Behavioral Interventions Program
Department of International Health, JHU Bloomberg School of Public Health

Integrated Population, Health and Environment (PHE) programs have been proposed as a way to address the interlocking challenges of health and development in an era of rapid environmental change. Learn how Dr. Winch and his team are working with organizations in Ethiopia implementing PHE programs to improve food security, health care and education.

Dr. Peter Winch is the Principal Investigator for the 2011-2012 E²SHI Seed Grant research project focused on population, health, and environment linkages in rural Ethiopia in collaboration with Hopkins researchers Ben Zaitchik, Ariel Greenberg and Caitlin Kennedy.
