Madan Sarup

An Introductory Guide to Post-structuralism and Postmodernism Madan Sarup, 1993 Madan Sarup has now revised his accessible and popular introduction to post-structuralist and postmodern theory. A new introductory section discusses the meaning of such concepts as modernity, postmodernity, modernization, modernism, and postmodernism. A section on feminist criticism of Lacan and Foucault has been added, together with a new chapter on French feminist theory focusing on the work of Hélène Cixous, Luce Irigaray, and Julia Kristeva. The chapter on postmodernism has been significantly expanded to include a discussion of Lyotard's language games and his use of the category sublime. This chapter ends with a discussion of the relationship between feminism and postmodernism. A further chapter has been added on the work of Jean Baudrillard, a cult figure on the current postmodernist scene, whose ideas have attained a wide currency. The chapter includes a new section on postmodern cultural practices as revealed in architecture, TV, video, and film. Suggestions for further reading are now listed at the end of each chapter and are upgraded and annotated. In tracing the impact of post-structuralist thought not only on literary criticism but on such disciplines as philosophy, politics, psychoanalysis, the social sciences, and art, this book will be essential reading for those who want a clear and incisive introduction to the theories that continue to have widespread influence. -- Back cover.

Identity, Culture and the Postmodern World Madan Sarup, 1996 This introductory guide surveys the work of a range of influential contemporary social theorists including Lacan, Baudrillard, Foucault, Said, Harvey and Haug and explains their analyses of current topics such as consumer identity and commodity aesthetics; post-colonial criticism; identity and narrative; and the general condition of postmodernity.

Marx Through Post-Structuralism Simon Choat, 2010-06-17 Marx Through Post-Structuralism presents a thorough critical examination of the readings of Marx given by four post-structuralist thinkers, all key figures in Continental philosophy: Jean-François Lyotard, Jacques Derrida, Michel Foucault, and Gilles Deleuze. Arguing that both Marx and the post-structuralists seek to produce a genuinely materialist philosophy, the author aims to develop a better understanding of both Marx and post-structuralism and in so doing to reflect on the possibilities and problems for materialist philosophy more broadly. Against the

common assumption that post-structuralism begins with a rejection of Marx, Choat argues that Marx has been a key influence on post-structuralist thought and that each of the four thinkers examined affirms Marx's contemporary significance. By looking at how these thinkers have read Marx - analysing their direct comments, unspoken uses, and implicit criticisms - the book demonstrates that there is a distinct and original post-structuralist approach to Marx that allows us to read him in a new light.

The Cambridge Companion to Postmodernism Steven Connor,2004-07-15 The Cambridge Companion to Postmodernism offers a comprehensive introduction to postmodernism. The Companion examines the different aspects of postmodernist thought and culture that have had a significant impact on contemporary cultural production and thinking. Topics discussed by experts in the field include postmodernism's relation to modernity, and its significance and relevance to literature, film, law, philosophy, architecture, religion and modern cultural studies. The volume also includes a useful guide to further reading and a chronology. This is an essential aid for students and teachers from a range of disciplines interested in postmodernism in all its incarnations. Accessible and comprehensive, this Companion addresses the many issues surrounding this elusive, enigmatic and often controversial topic.

Illness and Culture in the Postmodern Age David B. Morris,2023-11-10 We become ill in ways our parents and grandparents did not, with diseases unheard of and treatments undreamed of by them. Illness has changed in the postmodern era—roughly the period since World War II—as dramatically as technology, transportation, and the texture of everyday life. Exploring these changes, David B. Morris tells the fascinating story, or stories, of what goes into making the

postmodern experience of illness different, perhaps unique. Even as he decries the overuse and misuse of the term postmodern, Morris shows how brightly ideas of illness, health, and postmodernism illuminate one another in late-twentieth-century culture. Modern medicine traditionally separates disease—an objectively verified disorder—from illness—a patient's subjective experience. Postmodern medicine, Morris says, can make no such clean distinction; instead, it demands a biocultural model, situating illness at the crossroads of biology and culture. Maladies such as chronic fatigue syndrome and post-traumatic stress disorder signal our awareness that there are biocultural ways of being sick. The biocultural vision of illness not only blurs old boundaries but also offers a new and infinitely promising arena for investigating both biology and culture. In many ways *Illness and Culture in the Postmodern Age* leads us to understand our experience of the world differently.

Marxism and Education (RLE Edu L) Madan Sarup, 2013-05-13 This book introduces the student to the various phenomenological and humanistic Marxist perspectives as they are being applied to education and provides an account of the strengths and weaknesses of these perspectives, drawing on a variety of disciplines in order to explain the controversies described. The opening chapters deal with the phenomenological perspective in the sociology of education, discussing its adoption of a phenomenological model of man, its use of anthropological studies, the importance of classroom studies, and its rejection of the 'liberal' philosophy of education. The aim is to show the significance of these ideas for education, with a discussion of the concept of alienation and schooling, developments in Marxism such as the focus on the mode of production and the labour process, and the political economy of education.

The Big Book of Irony Jon Winokur, 2007-02-06 Jon Winokur defines and classifies irony and contrasts it with coincidence and cynicism, and other oft-confused concepts that many think are ironic. He looks at the different forms irony can take, from

an irony deficiency to visual irony to an understatement, using photographs and relate-able examples from pop culture. * Irony in Action looks at irony in language, both verbal and visual, while Bastions of Irony and Masters of Irony look at institutions and individuals steeped in irony, though not always intentionally. PLUS: * The Annals of Irony looks at irony, and its lack thereof, throughout history. A delight for anyone with a smart, dark sense of humor.

Beginning Theory Peter Barry,2002-09-07 In this second edition of Beginning Theory, the variety of approaches, theorists, and technical language is lucidly and expertly unraveled and explained, and allows readers to develop their own ideas once first principles have been grasped. Expanded and updated from the original edition first published in 1995, Peter Barry has incorporated all of the recent developments in literary theory, adding two new chapters covering the emergent Eco-criticism and the re-emerging Narratology.

Relativism in the Arts Betty Jean Craige,2010-12-01 In a world where the acceptance of relativism has caused erosion in the tradition of Cartesian dualism, representationalism in the arts has come under serious questioning. The contributors to this book seek new standards for defining and evaluating works of art. Relativism in the Arts brings together thinkers in the fields of music, art criticism, literary criticism, philosophy, and the “history of consciousness” to confront the problems of relativist aesthetics. Their essays range from theoretical discussions of the definition of art in our times to close examinations of particular artworks or art forms. The introduction by Betty Jean Craige presents reasons for the cultural self-reflectivity that gives rise to the peculiarities of modern art.

Beyond the Great Story Robert F. Berkhofer,1995 What legitimate form can history take when faced by the severe challenges issued in recent years by literary, rhetorical, multiculturalist, and feminist theories? That is the question considered in this pathbreaking book. Robert Berkhofer addresses the essential practical concern of contemporary historians.

Building a Bridge to the 18th Century Neil Postman,2011-06-08 At a time when we are reexamining our values, reeling from the pace of change, witnessing the clash between good instincts and pragmatism, dealing with the angst of a new millennium, Neil Postman, one of our most distinguished observers of contemporary society, provides for us a source of guidance and inspiration. In Building a Bridge to the Eighteenth Century he revisits the Enlightenment, that great flowering of ideas that provided a humane direction for the future -- ideas that formed our nation and that we would do well to embrace anew. He turns our attention to Goethe, Voltaire, Rousseau, Diderot, Kant, Edward Gibbon, Adam Smith, Thomas Paine, Jefferson, and Franklin, and to their then-radical thinking about inductive science, religious and political freedom, popular education, rational commerce, the nation-state, progress, and happiness. Postman calls for a future connected to traditions that provide sane authority and meaningful purpose -- as opposed to an overreliance on technology and an increasing disregard for the lessons of history. And he argues passionately for specific new guidelines in the education of our children,

with renewed emphasis on developing the intellect as successfully as we are developing a computer-driven world. Witty, provocative, and brilliantly reasoned, *Building a Bridge to the Eighteenth Century* is Neil Postman's most radical, and most commonsensical, book yet.

Higher Superstition Paul R. Gross, Norman Levitt, 1997-12-03 The widely acclaimed response to the postmodernists attacks on science, with a new afterword. With the emergence of cultural studies and the blurring of once-clear academic boundaries, scholars are turning to subjects far outside their traditional disciplines and areas of expertise. In *Higher Superstition* scientists Paul Gross and Norman Levitt raise serious questions about the growing criticism of science by humanists and social scientists on the academic left. This edition of *Higher Superstition* includes a new afterword by the authors.
