

An Introductory Guide To Post Structuralism And Postmodernism Madan Sarup

Jon Winokur

An Introductory Guide to Post-structuralism and Postmodernism Madan Sarup,1993-01-01 Madan Sarup has now revised his accessible and popular introduction to post-structuralist and postmodern theory. A new introductory section discusses the meaning of such concepts as modernity, postmodernity, modernization, modernism, and postmodernism. A section on feminist criticism of Lacan and Foucault has been added, together with a new chapter on French feminist theory focusing on the work of Hélène Cixous, Luce Irigaray, and Julia Kristeva. The chapter on postmodernism has been significantly expanded to include a discussion of Lyotard's language games and his use of the category sublime. This chapter ends with a discussion of the relationship between feminism and postmodernism. A further chapter has been added on the work of Jean Baudrillard, a cult figure on the current postmodernist scene, whose ideas have attained a wide currency. The chapter includes a new section on postmodern cultural practices as revealed in architecture, TV, video, and film. Suggestions for further reading are now listed at the end of each chapter and are upgraded and annotated. In tracing the impact of post-structuralist thought not only on literary criticism but on such disciplines as philosophy, politics, psychoanalysis, the social sciences, and art, this book will be essential reading for those who want a clear and incisive introduction to the theories that continue to have widespread influence.

Identity, Culture and the Postmodern World Madan Sarup,1996 This introductory guide surveys the work of a range of influential contemporary social theorists including Lacan, Baudrillard, Foucault, Said, Harvey and Haug and explains their analyses of current topics such as consumer identity and commodity aesthetics; post-colonial criticism; identity and narrative; and the general condition of postmodernity.

Seeking Passage Rebecca A. Martusewicz, 2001 In this eloquent collection of essays, Rebecca Martusewicz positions a philosophy of education that relies on what transpires between teachers and learners in various contexts. She thoughtfully analyzes how, in the relationship between teachers and learners, all kinds of ideas, beliefs, interpretations, and meanings are generated as a result of potent generative forces that depend, as she demonstrates using post-structuralist theories, on difference as their fuel. Ultimately she argues that to become educated requires an attention to the welfare of self and others and a willingness to confront and shift one's own habits, practices, and beliefs for that purpose. This work contains: clear translations of post-structuralist theories such as those of Deleuze, Serres, and Derrida; well-written essays that blend good storytelling, theory, and ethical analysis to reconceptualize education as the means toward social justice; and a clear argument for the drawing together of analyses of difference introduced by post-structuralism with attention to ethics and social justice as they apply to education.

Marxism and Education (RLE Edu L) Madan Sarup, 2013-05-13 This book introduces the student to the various phenomenological and humanistic Marxist perspectives as they are being applied to education and provides an account of the strengths and weaknesses of these perspectives, drawing on a variety of disciplines in order to explain the controversies described. The opening chapters deal with the phenomenological perspective in the sociology of education, discussing its adoption of a phenomenological model of man, its use of anthropological studies, the importance of classroom studies, and its rejection of the 'liberal' philosophy of education. The aim is to show the significance of these ideas for education, with a discussion of the concept of alienation and schooling, developments in Marxism such as the focus on the mode of production and the labour process, and the political economy of education.

Beyond the Great Story Robert F. Berkhofer, 1995 What legitimate form can history take when faced by the severe challenges issued in recent years by literary, rhetorical, multiculturalist, and feminist theories? That is the question considered in this pathbreaking book. Robert Berkhofer addresses the essential practical concern of contemporary historians.

The Big Book of Irony Jon Winokur, 2013-12-10 Jon Winokur defines and classifies irony and contrasts it with coincidence and cynicism, and other oft-confused concepts that many think are ironic. He looks at the different forms irony can take, from an irony deficiency to visual irony to an understatement, using photographs and relate-able examples from pop culture. * Irony in Action looks at irony in language, both verbal and visual, while Bastions of Irony and Masters of Irony

look at institutions and individuals steeped in irony, though not always intentionally. PLUS: * The Annals of Irony looks at irony, and its lack thereof, throughout history. A delight for anyone with a smart, dark sense of humor.

Building a Bridge to the 18th Century Neil Postman,2011-06-08 At a time when we are reexamining our values, reeling from the pace of change, witnessing the clash between good instincts and pragmatism, dealing with the angst of a new millennium, Neil Postman, one of our most distinguished observers of contemporary society, provides for us a source of guidance and inspiration. In *Building a Bridge to the Eighteenth Century* he revisits the Enlightenment, that great flowering of ideas that provided a humane direction for the future -- ideas that formed our nation and that we would do well to embrace anew. He turns our attention to Goethe, Voltaire, Rousseau, Diderot, Kant, Edward Gibbon, Adam Smith, Thomas Paine, Jefferson, and Franklin, and to their then-radical thinking about inductive science, religious and political freedom, popular education, rational commerce, the nation-state, progress, and happiness. Postman calls for a future connected to traditions that provide sane authority and meaningful purpose -- as opposed to an overreliance on technology and an increasing disregard for the lessons of history. And he argues passionately for specific new guidelines in the education of our children, with renewed emphasis on developing the intellect as successfully as we are developing a computer-driven world. Witty, provocative, and brilliantly reasoned, *Building a Bridge to the Eighteenth Century* is Neil Postman's most radical, and most commonsensical, book yet.

Relativism in the Arts Betty Jean Craige,2010-12-01 In a world where the acceptance of relativism has caused erosion in the tradition of Cartesian dualism, representationalism in the arts has come under serious questioning. The contributors to this book seek new standards for defining and evaluating works of art. *Relativism in the Arts* brings together thinkers in the fields of music, art criticism, literary criticism, philosophy, and the "history of consciousness" to confront the problems of relativist aesthetics. Their essays range from theoretical discussions of the definition of art in our times to close examinations of particular artworks or art forms. The introduction by Betty Jean Craige presents reasons for the cultural self-reflectivity that gives rise to the peculiarities of modern art.

Annie John Jamaica Kincaid,2009-07-01 Annie John's story is so touching and familiar it could be happening to any of us, anywhere, any time, any place. And that's exactly the book's strength, its wisdom, its truth. --The New York Times Book Review

This paperback edition of *Higher Superstition* includes a

new afterword by the authors.

Postmodern Narrative Theory Mark Currie, 2010-12-09 How have developments in literary and cultural theory transformed our understanding of narrative? What has happened to narrative in the wake of poststructuralism? What is the role and function of narrative in the contemporary world? In this revised, updated and expanded new edition of an established text, Mark Currie explores these central questions and guides students through the complex theories that have shaped the study of narrative in recent decades. *Postmodern Narrative Theory, Second Edition*: • establishes direct links between the workings of fictional narratives and those of the non-fictional world • charts the transition in narrative theory from its formalist beginnings, through deconstruction, towards its current concerns with the social, cultural and cognitive uses of narrative • explores the relationship between postmodern narrative and postmodern theory more closely • presents detailed illustrative readings of known literary texts such as Stevenson's *Dr Jekyll and Mr Hyde* and Conrad's *Heart of Darkness*, and now features a new chapter on Coetzee's *Elizabeth Costello* and *Slow Man*. Approachable and stimulating, this is an essential introduction for anyone studying postmodernism, the theory of narrative or contemporary fiction.

Derrida Simon Glendinning, 2011-08-25 Jacques Derrida, the French philosopher, developed his critical technique known as 'deconstruction'. His work is associated with ideas surrounding both post-structuralism and post-modern philosophy, and he was known to have challenged some of the unquestioned assumptions of our philosophical tradition. In this *Very Short Introduction*, Simon Glendinning explores both the difficulty and significance of the work of Derrida. He presents Derrida's challenging ideas as making a significant contribution to, and providing a powerful reading of, our philosophical heritage. Defending Derrida against many of the charges that were placed against him, he attempts to show why Derrida's work causes such extreme reactions. Glendinning explains Derrida's distinctive mode of engagement with our philosophical tradition, and shows that this is not a merely negative thing. By exploring his most famous and influential texts, Glendinning shows how and why Derrida's work of deconstruction is inspired not by a 'critical frenzy', but by a loving respect for philosophy. ABOUT THE SERIES: The *Very Short Introductions* series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Postmodernism & a Sociology...(c) , In the fifth volume in the Studies in American Sociology Series, Stanford M. Lyman offers commentaries on and critiques of postmodernism, poststructuralism, and deconstruction, posing questions concerning theoretical and epistemological problems arising from what appears to be a nouvelle vague. Postmodernism, poststructuralism, and deconstructionism are interrelated aspects of the newest theoretical development in sociology and the social sciences. This new wave of thought challenges virtually all paradigms currently in use. In this, his fifth volume in the Studies in American Sociology Series, Stanford M. Lyman offers commentaries on and critiques of this new perspective, posing questions concerning theoretical and epistemological problems arising from what appears to be a nouvelle vague. Among the basic themes and issues explored are the allegation that modernity has defaulted on the promise of the Enlightenment; the question of whether the rational basis for knowledge and action is still valid; the controversy over the place of metanarratives and macrosociological outlooks; and newer concerns over race, gender, sexual preferences, the self, and the Other. Professor Lyman provides empirically based and historically specific analyses of the relation of the race question to the problem of otherness and to the legal construction of racial identity in American court proceedings. Focusing on the issues of citizenship affecting European, Middle Eastern, and Asian immigrants; African Americans; and the special cases of the Chinese and Native Americans, he relates major public problems to the modern as well as the postmodern perspectives on justice. The debate over assimilation and multiculturalism, the dynamics of gender-specific emotions as expressed in six decades of Hollywood films, and the postmodern approach to deviance are each examined. He also offers proposals for a social science attuned to, but critical of, postmodernism and poststructuralism. Such a sociology might offer a perspective that treats the drama of social relations in the routine as well as the remarkable aspects of everyday life. Professor Lyman provides not only a new understanding of postmodernism but also a program of how to proceed with respect to its challenges.

Landscapes of Abandonment Roger A. Salerno,2012-02-01 Using social theory and cultural analysis, Roger A. Salerno explores the relationship of abandonment to the construction of contemporary capitalistic cultures. Beginning with an array of narratives on the emergence of capitalism in the West and its undermining of traditional social institutions and structures, he provides an overview of both the definition of and reactions to abandonment, analyzing its historical, social, and psychological dimensions. The author contends that abandonment anxiety and feelings of estrangement not only have deep psychological roots, but also important social causes and cultural manifestations such as a quest for security or a hunger for commodities. Salerno surveys important contributions of writers, artists, philosophers, and social scientists and how their work expresses this sense of modern abandonment. He also examines how and why this phenomenon has become a central motif in renderings of community, the environment, and the process of globalization and presents a richer understanding of

our modern social condition.

Using Functional Analysis in Archival Appraisal Marcus C. Robyns, 2014-07-02 The identification of recorded information with continuing value that documents corporate and cultural memory is one of the archivist's primary tasks, and he/she accomplishes this mission, in part, through the process of appraisal. But does traditional archival appraisal, based on the concepts of primary and evidential values, effectively serve the needs of institutional archivists and records managers? In an age of scarcity and the challenge of electronic records, can archivists and records managers continue to rely upon a methodology essentially unchanged since the early 1950s? *Using Functional Analysis in Archival Appraisal: A Practical and Effective Alternative to Traditional Appraisal Methodologies* shows how archivists in other countries are already using functional analysis, which offers a better, more effective, and imminently more practical alternative to traditional appraisal methodologies that rely upon an analysis of the records themselves. From this book, information professionals will learn what functional analysis is and how it is already used around the world; its useful application for a variety of record types and media, including print, non-textual, electronic, and "born-digital" records; how functional analysis provides an alternative to a hierarchical arrangement scheme based upon record groups, sub-groups, and series that mimics the structure of an institution or organization; a recommended process for the practical and effective implementation of functional analysis.
