The Narrowboat Guide Tony Jones,2016-03-10 The UK has over 1000 miles of navigable canals and rivers which are home to an estimated over 70,000 boats. To the untrained eye canal boats can look much the same, but there are some very important distinctions and a new buyer has some very important choices to make. This book discusses those choices, taking into consideration the various boating profiles. From those choosing to live on board permanently, to constant cruisers, and weekend boaters to fair-weather cruisers, each will require a different type of boat if they are to fully enjoy their new vessel. The book covers finding and buying a boat, the legalities of purchase, the different features and utilities, finding a mooring, boating health and safety, the cost of boating, boat maintenance, boating etiquette and many other frequently asked questions.

Imperial Leather Anne McClintock,2013-10-01 *Imperial Leather* chronicles the dangerous liaisons between gender, race and class that shaped British imperialism and its bloody dismantling. Spanning the century between Victorian Britain and the current struggle for power in South Africa, the book takes up the complex relationships between race and sexuality, fetishism and money, gender and violence, domesticity and the imperial market, and the gendering of nationalism within the zones of imperial and anti-imperial power.

Creatures of Empire Virginia DeJohn Anderson,2004-11-15 When we think of the key figures of early American history, we think of explorers, or pilgrims, or Native Americans--not cattle, or goats, or swine. But as Virginia DeJohn Anderson reveals in this brilliantly original account of colonists in New England and the Chesapeake region, livestock played a vitally important role in the settling of the New World. Livestock, Anderson writes, were a central factor in the cultural clash between colonists and Indians as well as a driving force in the expansion west. By bringing livestock across the Atlantic, colonists believed that they provided the means to realize America's potential. It was thought that if the Native Americans learned to keep livestock as well, they would be that much closer to assimilating the colonists' culture, especially their Christian faith. But colonists failed to anticipate the problems that would arise as Indians began encountering free-ranging livestock at almost every turn, often trespassing in their cornfields. Moreover, when growing populations and an expansive style of husbandry required far more space than they had expected, colonists could see no alternative but to appropriate Indian land. This created tensions that reached the boiling point with King Philip's War and Bacon's Rebellion. And it established a pattern that would repeat time and again over the next two centuries. A stunning account that presents our history in a truly new light, *Creatures of Empire* restores a vital element of our past, illuminating one of the great forces of colonization and the expansion westward.

A History of Tasmania, from Its Discovery in 1642 to the Present Time James Fenton,1884 James Fenton (1820-1901) was

born in Ireland and emigrated to Tasmania (then known as Van Diemen's Land) with his family in 1833. He became a pioneer settler in an area on the Forth River and published this history of the island in 1884. The book begins with the discovery of the island in 1642 and concludes with the deaths of some significant public figures in the colony in 1884. The establishment of the colony on the island, and the involvement of convicts in its building, is documented. A chapter on the native aborigines gives a fascinating insight into the attitudes of the colonising people, and a detailed account of the removal of the native Tasmanians to Flinders Island, in an effort to separate them from the colonists. The book also contains portraits of some aboriginal people, as well as a glossary of their language.

Green Planets Gerry Canavan, Kim Stanley Robinson, 2014-04-15 Contemporary visions of the future have been shaped by hopes and fears about the effects of human technology and global capitalism on the natural world. In an era of climate change, mass extinction, and oil shortage, such visions have become increasingly catastrophic, even apocalyptic. Exploring the close relationship between science fiction, ecology, and environmentalism, the essays in *Green Planets* consider how science fiction writers have been working through this crisis. Beginning with H. G. Wells and passing through major twentieth-century writers like Ursula K. Le Guin, Stanislaw Lem, and Thomas Disch to contemporary authors like Margaret Atwood, China Miéville, and Paolo Bacigalupi—as well as recent blockbuster films like *Avatar* and *District 9*—the essays in *Green Planets* consider the important place for science fiction in a culture that now seems to have a very uncertain future. The book includes an extended interview with Kim Stanley Robinson and an annotated list for further exploration of ecological SF and related works of fiction, nonfiction, films, television, comics, children's cartoons, anime, video games, music, and more. Contributors include Christina Alt, Brent Bellamy, Sabine Höhler, Adeline Johns-Putra, Melody Jue, Rob Latham, Andrew Milner, Timothy Morton, Eric C. Otto, Michael Page, Christopher Palmer, Gib Prettyman, Elzette Steenkamp, Imre Szeman.

Culture and Sustainable Development in the Pacific Antony Hooper, 2005-04-01 Throughout the South Pacific, notions of 'culture' and 'development' are very much alive—in political debate, the media, sermons, and endless discussions amongst villagers and the urban élites, even in policy reports. Often the terms are counterposed, and development along with 'economic rationality', 'good governance' and 'progress' is set against culture or 'custom', 'tradition' and 'identity'. The decay of custom and impoverishment of culture are often seen as wrought by development, while failures of development are haunted by the notion that they are due, somehow, to the darker, irrational influences of culture. The problem is to resolve the contradictions between them so as to achieve the greater good—access to material goods, welfare and amenities, 'modern life'—without the sacrifice of the 'traditional' values and institutions that provide material security and sustain diverse social identities. Resolution is sought in this book by a number of leading writers from the South Pacific including Langi Kavaliku, Epeli Hau'ofa, Marshall Sahlins, Malama Meleisea, Joeli Veitayaki, and Tarcisius Tara Kabutaulaka. The

volume is brought together for UNESCO by Antony Hooper, Professor Emeritus at the University of Auckland. UNESCO experts include Richard Engelhardt, Langi Kavaliku, Russell Marshall, Malama Meleisea, Edna Tait and Mali Voi.

Lord Minto John Buchan, 1924

The Natural History of Santo Philippe Bouchet, Hervé Le Guyader, Olivier Pascal, 2011 Santo, the largest island in the South Pacific nation of Vanuatu, is an extraordinary geographical and cultural microcosm, combining reefs, caves, mountains, and satellite isles--with human history that dates back 3,000 years. Collecting contributions from more than one hundred authors, *The Natural History of Santo* is the result of a 2006 Santo expedition, which brought together scientists, volunteers, and students from twenty-five countries. This lavishly illustrated book pays homage to the biodiversity of this planet-island and bridges the gaps between scientific knowledge, conservation, and education.

The Last Puritan George Santayana, 1981-02 Published in 1935, George Santayana's *The Last Puritan* was the American philosopher's only novel and it became an instant best-seller, immediately linked in its painful voyage of self-discovery to *The Education of Henry Adams*. It is essentially a novel of ideas expressed in the birth, life, and early death of Oliver Alden. In Oliver's case the puritanical self-destruction that prevented him from realizing his own spirituality is transcended by his attainment of the type of self-knowledge that Santayana recommends throughout his moral philosophy. *The Last Puritan* is volume four in a new critical edition of George Santayana's works that restores Santayana's original text and provides important new scholarly information. Books in this series - the first complete publication of Santayana's works - include an editorial apparatus with notes to the text (identifying persons, places, and ideas), textual commentary (including a description of the composition and publication history, along with a discussion of editorial methods and decisions), lists of variants and emendations, and line-end hyphenations.
