Anthropology Robert H. Lavenda,Emily Ann Schultz,2021 This is a general, four fields, anthropology textbook--

Sweet Surrender Dennis Hiebert,2013-07-09 Every culture has a way of perceiving and practicing marriage. Many contemporary Western Christians mistake what their culture prescribes regarding marriage with what the Bible portrays, and thereby take as biblical what is merely cultural. Uncritical conformity to cultural imperatives of marriage then becomes a Christian virtue, and a sweet surrender. Few recognize, much less question this confusion, even when its consequences are unhealthy. In Sweet Surrender Dennis Hiebert challenges Christians to comprehend what is cultural in their view of marriage, hold as optional what is not explicitly required by the Bible, and live out their marriages within the transcendent grace of God. Gaining greater awareness can free marriages from the control of culture for something more simply but deeply Christian. Marriages benefit when they are released from cultural directives that are not biblical callings, even if they choose to retain them as cultural practices. This book is for Christians who are ready to rethink their assumptions about marriage.

Core Concepts in Cultural Anthropology Robert H. Lavenda,Emily Ann Schultz,2003 Designed to address the needs of anthropology professors who prefer to make extensive use of ethnographies and other supplementary readings in their courses, this is a concise, accurate introduction to the basic ideas and practices of contemporary cultural anthropology. Not a

standard textbook, Core Concepts is more like an annotated bibliography of the terms and concepts that anthropologists use in their work. The book will prepare students to read ethnography more effectively and with less confusion and misunderstanding.

Making the Connections Anne Padias, Joshua Osbourn, 2023-01-30

The Anthropology of Experience Victor Witter Turner, Edward M. Bruner, 1986 Fourteen authors, including many of the best-known scholars in the field, explore how people actually experience their culture and how those experiences are expressed in forms as varied as narrative, literary work, theater, carnival, ritual, reminiscence, and life review. Their studies will be of special interest for anyone working in anthropological theory, symbolic anthropology, and contemporary social and cultural anthropology, and useful as well for other social scientists, folklorists, literary theorists, and philosophers.

Cuban Color in Tourism and la Lucha Lorecia Kaifa Roland, 2011 Cuban Color in Tourism and La Lucha: An Ethnography of Racial Meanings offers a provocative look at what it means to belong in modern socialist Cuba. Drawn from her extensive travels throughout Cuba over the past decade, author L. Kaifa Roland pulls back the curtain on a country that has remained mysterious to Americans since the mid-twentieth century. Through vivid vignettes and firsthand details, Roland exposes the lasting effects of the collapse of the Soviet Union and the subsequent rise of state-sponsored segregated tourism in Cuba. She demonstrates how the creation of separate spheres for locals and tourists has had two effects. First, tourism reestablished the racial apartheid that plagued pre-revolutionary Cuba. Second, it reinforced how the state's desire to maintain a socialist ideology in face of its increasing reliance on capitalist tools is at odds with the day-to-day struggles--or La Lucha--of the Cuban people. Roland uses conversations and anecdotes gleaned from a year of living among locals as a way of delving into these struggles and understanding what constitutes life in Cuba today. In exploring the intersections of race, class, and gender, she gives readers a better understanding of the common issues of status and belonging for tourists and their hosts in Cuba. Cuban Color in Tourism and La Lucha is one of several volumes in the Issues of Globalization: Case Studies in Contemporary Anthropology series, which examines the experiences of individual communities in our contemporary world. Each volume offers a brief and engaging exploration of a particular issue arising from globalization and its cultural, political, and economic effects on certain peoples or groups. Ideal for introductory anthropology courses--and as

supplements for a variety of upper-level courses--these texts seamlessly combine portraits of an interconnected and globalized world with narratives that emphasize the agency of their subjects.

Eradicating Human Trafficking: Culture, Law and Policy Gabriela Curras DeBellis, 2021-12-13 With over 40 million people still enslaved around the world, this book takes a closer look at the role of culture in society and how certain practices, beliefs or behaviors may be fueling human trafficking beyond what the law can curtail. The study reveals cultural elements that conflict with existing anti-human trafficking laws across three case studies (United States, India and Costa Rica). There is no simple answer or a single solution to stop or significantly reduce the crime, but a pragmatic, multi-disciplinary, and human rights approach to the problem may bring to light that, efforts to curtail human trafficking will be in vain if we rely on law alone. A fundamental shift in culture is imperative.

An Anthropology of Anthropology Robert Borofsky, 2019-03-21 The book uses anthropological methods and insights to study the practice of anthropology. It calls for a paradigm shift, away from the publication treadmill, toward a more profile-raising paradigm that focuses on addressing a broad array of social concerns in meaningful ways.

Introducing Anthropology Michael Alan Park, 2006

Anthropology Robert H Lavenda, Emily Ann Schultz, Cynthia Marnie Zutter, 2016-02-15 Anthropology asks what it means to be human, incorporating answers from all four major subfields of anthropology - biological anthropology, archaeology, linguistic anthropology, and cultural anthropology - as well as applied anthropology. Fully conveying the richness of the discipline, this detailed yet accessible introduction helps students gain a deeper understanding of the human condition by looking at themselves and the world around them through an anthropological lens.

How to Think Like an Anthropologist Matthew Engelke, 2019-06-18 What is anthropology? What can it tell us about the world? Why, in short, does it matter? For well over a century, cultural anthropologists have circled the globe, from Papua New Guinea to suburban England and from China to California, uncovering surprising facts and insights about how humans organize their lives and articulate their values. In the process, anthropology has done more than any other discipline to

reveal what culture means--and why it matters. By weaving together examples and theories from around the world, Matthew Engelke provides a lively, accessible, and at times irreverent introduction to anthropology, covering a wide range of classic and contemporary approaches, subjects, and practitioners. Presenting a set of memorable cases, he encourages readers to think deeply about some of the key concepts with which anthropology tries to make sense of the world--from culture and nature to authority and blood. Along the way, he shows why anthropology matters: not only because it helps us understand other cultures and points of view but also because, in the process, it reveals something about ourselves and our own cultures, too. --Cover.

What Does it Mean to be Human? Richard Potts, Christopher Sloan, 2010 This generously illustrated book tells the story of the human family, showing how our species' physical traits and behaviors evolved over millions of years as our ancestors adapted to dramatic environmental changes. In *What Does It Mean to Be Human?* Rick Potts, director of the Smithsonian's Human Origins Program, and Chris Sloan, National Geographic's paleoanthropology expert, delve into our distant past to explain when, why, and how we acquired the unique biological and cultural qualities that govern our most fundamental connections and interactions with other people and with the natural world. Drawing on the latest research, they conclude that we are the last survivors of a once-diverse family tree, and that our evolution was shaped by one of the most unstable eras in Earth's environmental history. The book presents a wealth of attractive new material especially developed for the Hall's displays, from life-like reconstructions of our ancestors sculpted by the acclaimed John Gurche to photographs from National Geographic and Smithsonian archives, along with informative graphics and illustrations. In coordination with the exhibit opening, the PBS program NOVA will present a related three-part television series, and the museum will launch a website expected to draw 40 million visitors.

Role-Playing Game Studies Sebastian Deterding, José Zagal, 2018-04-17 This handbook collects, for the first time, the state of research on role-playing games (RPGs) across disciplines, cultures, and media in a single, accessible volume. Collaboratively authored by more than 50 key scholars, it traces the history of RPGs, from wargaming precursors to tabletop RPGs like *Dungeons & Dragons* to the rise of live action role-play and contemporary computer RPG and massively multiplayer online RPG franchises, like *Fallout* and *World of Warcraft*. Individual chapters survey the perspectives, concepts, and findings on RPGs from key disciplines, like performance studies, sociology, psychology, education, economics, game design, literary studies, and more. Other chapters integrate insights from RPG studies around broadly significant topics, like transmedia worldbuilding, immersion, transgressive play, or player-character relations. Each chapter includes definitions of key terms and recommended readings to help fans, students, and scholars new to RPG studies find their way into this new interdisciplinary field.

Sacred Rice Joanna Davidson, 2016 *Sacred Rice* explores the cultural intricacies through which Jola farmers in West

Africa are responding to their environmental and economic conditions given the centrality of a crop--rice--that is the lynchpin for their economic, social, religious, and political worlds. Based on more than ten years of author Joanna Davidson's ethnographic and historical research on rural Guinea-Bissau, this book looks at the relationship among people, plants, and identity as it explores how a society comes to define itself through the production, consumption, and reverence of rice. It is a narrative profoundly tied to a particular place, but it is also a story of encounters with outsiders who often mediate or meddle in the rice enterprise. Although the focal point is a remote area of West Africa, the book illuminates the more universal nexus of identity, environment, and development, especially in an era when many people--rural and urban--are confronting environmental changes that challenge their livelihoods and lifestyles.

Theory in Social and Cultural Anthropology R. Jon McGee, Richard L. Warms, 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences. Over the past 150 years, the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it. Consequently, both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar, if they have heard of them at all. Students, in particular, are likely to turn to the web to find quick background information on theorists and theories. However, most web-based information is inaccurate and/or lacks depth. Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics—the who, what, where, how, and why, if you will. In response, SAGE Reference plans to publish the two-volume *Theory in Social and Cultural Anthropology: An Encyclopedia*. Features & Benefits: Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory, both in terms of breadth and depth of coverage. To ease navigation between and among related entries, a Reader's Guide groups entries thematically and each entry is followed by Cross-References. In the electronic version, the Reader's Guide combines with the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present. Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion.

Democratic Insecurities Erica Caple James, 2010-05-14 *Democratic Insecurities* focuses on the ethics of military and humanitarian intervention in Haiti during and after Haiti's 1991 coup. In this remarkable ethnography of violence, Erica Caple James explores the traumas of Haitian victims whose experiences were denied by U.S. officials and recognized only selectively by other humanitarian providers. Using vivid first-person accounts from women survivors, James raises important new questions about humanitarian aid, structural violence, and political insecurity. She discusses the politics of postconflict assistance to Haiti and the challenges of promoting democracy, human rights, and justice in societies that experience chronic

insecurity. Similarly, she finds that efforts to promote political development and psychosocial rehabilitation may fail because of competition, strife, and corruption among the individuals and institutions that implement such initiatives.
