## L.A. Annetta, Stephen Bronack

*Chemical Dependency Counseling* Robert R. Perkinson, 2008 This comprehensive treatment manual - written specifically for chemical dependency counsellors - guides practitioners through all aspects of traditional treatment.

Essentials of Chemical Dependency Counseling Gary Lawson, Ann W. Lawson, P. Clayton Rivers, 2001 The newly revised edition of this well-known, evidence-based text presents new ways of thinking about and addressing problems related to chemical dependency treatment and prevention. *Essentials of Chemical Dependency Counseling, Third Edition* explores the full range of issues that face today's counselors and counselors-in-training. Also included are practical suggestions for career success. The revised edition now offers two new chapters on counseling those who are reluctant to recover and harm reduction; up-to-date material on legal and ethical issues, family counseling, and diversity; a new assessment instrument for client characterization; coverage of Technical Assistance Publication 21, the new national standards for training chemical dependency counselors; a new appendix containing useful chemical dependency-related Web sites; and updated frequently asked questions and answers about clients and the counseling field. The use of chapter objectives and discussion questions and the availability of an instructor's manual make this an ideal textbook for use in chemical dependency counseling courses in programs of psychology, family therapy, and social work.

**The Texas Model for Comprehensive School Counseling Programs**, 2018-02-15 The Texas Model for Comprehensive School Counseling Programs is a resource to develop effective and high quality comprehensive school counseling programs that align with Texas statutes and rules governing the work of school counselors. It outlines a process for tailoring school counseling programs to meet the varying needs of students across an array of school districts through implementation of the four components of school counseling programs, Guidance Curriculum, Responsive Services,

Individual Planning, and System Support. With this resource, a school counselor will learn to use campus-specific data to identify the unique needs of a campus and design a comprehensive school counseling program to meet those needs. Recognizing the important roles of the entire educational community, the Texas Model for Comprehensive School Counseling Programs provides examples of how parents, teachers, administrators, principals and school counselors can best contribute to implementation of each of the four components of comprehensive school counseling programs. It provides a developmental framework for a school counseling program curriculum that includes activities at each grade level to enhance students' educational, career, personal and social development.

*TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019)* U.S. Department of Health and Human Services, 2019-11-19 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

*The Adult Learner* Malcolm S. Knowles, Elwood F. Holton III, Richard A. Swanson, RICHARD SWANSON, Petra A. Robinson, 2020-12-20 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids including a PowerPoint presentation for each chapter. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning

practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

*Teaching at Its Best* Linda B. Nilson, 2010-04-20 Teaching at Its Best This third edition of the best-selling handbook offers faculty at all levels an essential toolbox of hundreds of practical teaching techniques, formats, classroom activities, and exercises, all of which can be implemented immediately. This thoroughly revised edition includes the newest portrait of the Millennial student; current research from cognitive psychology; a focus on outcomes maps; the latest legal options on copyright issues; and how to best use new technology including wikis, blogs, podcasts, vodcasts, and clickers. Entirely new chapters include subjects such as matching teaching methods with learning outcomes, inquiry-guided learning, and using visuals to teach, and new sections address Felder and Silverman's Index of Learning Styles, SCALE-UP classrooms, multiple true-false test items, and much more. Praise for the Third Edition of Teaching at Its Best Everyone veterans as well as novices will profit from reading Teaching at Its Best, for it provides both theory and practical suggestions for handling all of the problems one encounters in teaching classes varying in size, ability, and motivation. Wilbert McKeachie, Department of Psychology, University of Michigan, and coauthor, McKeachie's Teaching Tips This new edition of Dr. Nilson's book, with its completely updated material and several new topics, is an even more powerful collection of ideas and tools than the last. What a great resource, especially for beginning teachers but also for us veterans! L. Dee Fink, author, Creating Significant Learning Experiences This third edition of Teaching at Its Best is successful at weaving the latest research on teaching and learning into what was already a thorough exploration of each topic. New information on how we learn, how students develop, and innovations in instructional strategies complement the solid foundation established in the first two editions. Marilla D. Svinicki, Department of Psychology, The University of Texas, Austin, and coauthor, McKeachie's Teaching Tips

The Beaten Path, A Mainstream Guide to Understanding Addiction, Treatment, and Recovery Larry Maule, 2007-02-01 The Beaten Path brings information on addiction, treatment, recovery, relapse and relapse prevention that is tried, tested and considered most effective by the majority in the mainstream of this field. Complicated and difficult-to-understand principles of addiction, treatment, recovery and relapse are explained in a simple, practical and interesting way. The Beaten Path was written for anyone who is seeking to understand why addiction begins and what can be done about it. The author, Larry Maule Jr., is a member of The Certification Board of Addictions Professionals of Florida and has worked with men, women and adolescents as a professional addictions counselor since 1989. He organized and directed the development of Restoration Ministries of Tampa Bay Inc. in 2000. Larry has also been in personal recovery since 1984. Being on both sides of treatment has given Larry the practical knowledge and experience he shares in this book.

**Learning, Creating, and Using Knowledge** Joseph D. Novak, 2010-02-02 This fully revised and updated edition of Learning, Creating, and Using Knowledge recognizes that the future of economic well being in today's knowledge and

information society rests upon the effectiveness of schools and corporations to empower their people to be more effective learners and knowledge creators. Novak's pioneering theory of education presented in the first edition remains viable and useful. This new edition updates his theory for meaningful learning and autonomous knowledge building along with tools to make it operational – that is, concept maps, created with the use of CMapTools and the V diagram. The theory is easy to put into practice, since it includes resources to facilitate the process, especially concept maps, now optimised by CMapTools software. CMapTools software is highly intuitive and easy to use. People who have until now been reluctant to use the new technologies in their professional lives will find this book particularly helpful. Learning, Creating, and Using Knowledge is essential reading for educators at all levels and corporate managers who seek to enhance worker productivity.

*Teaching Engineering, Second Edition* Phillip C. Wankat, Frank S. Oreovicz, 2015-01-15 The majority of professors have never had a formal course in education, and the most common method for learning how to teach is on-the-job training. This represents a challenge for disciplines with ever more complex subject matter, and a lost opportunity when new active learning approaches to education are yielding dramatic improvements in student learning and retention. This book aims to cover all aspects of teaching engineering and other technical subjects. It presents both practical matters and educational theories in a format useful for both new and experienced teachers. It is organized to start with specific, practical teaching applications and then leads to psychological and educational theories. The practical orientation section explains how to develop objectives and then use them to enhance student learning, and the theoretical orientation section discusses the theoretical basis for learning/teaching and its impact on students. Written mainly for PhD students and professors in all areas of engineering, the book may be used as a text for graduate-level classes and professional workshops or by professionals who wish to read it on their own. Although the focus is engineering education, most of this book will be useful to teachers in other disciplines. Teaching is a complex human activity, so it is impossible to develop a formula that guarantees it will be excellent. However, the methods in this book will help all professors become good teachers while spending less time preparing for the classroom. This is a new edition of the well-received volume published by McGraw-Hill in 1993. It includes an entirely revised section on the Accreditation Board for Engineering and Technology (ABET) and new sections on the characteristics of great teachers, different active learning methods, the application of technology in the classroom (from clickers to intelligent tutorial systems), and how people learn.

Screening and Assessing Adolescents for Substance Use Disorders Ken C. Winters, 2000 Presents information on identifying, screening, and assessing adolescents who use substances. This report focuses on the most current procedures and instruments for detecting substance abuse among adolescents, conducting comprehensive assessments, and beginning treatment planning. Presents appropriate strategies and guidelines for screening and assessment. Explains legal issues concerning Federal and State confidentiality laws. Provides guidance for screening and assessing adolescents in juvenile

justice settings. Summarizes instruments to screen and assess adolescents for substance and general functioning domains.

Serious Educational Game Assessment: Practical Methods and Models for Educational Games, Simulations and Virtual Worlds L.A. Annetta, Stephen Bronack, 2011-07-22 In an increasingly scientific and technological world the need for a knowledgeable citizenry, individuals who understand the fundamentals of technological ideas and think critically about these issues, has never been greater. There is growing appreciation across the broader education community that educational three dimensional virtual learning environments are part of the daily lives of citizens, not only regularly occurring in schools and in after-school programs, but also in informal settings like museums, science centers, zoos and aquariums, at home with family, in the workplace, during leisure time when children and adults participate in community-based activities. This blurring of the boundaries of where, when, why, how and with whom people learn, along with better understandings of learning as a personally constructed, life-long process of making meaning and shaping identity, has initiated a growing awareness in the field that the questions and frameworks guiding assessing these environments should be reconsidered in light of these new realities. The audience for this book will be researchers working in the Serious Games arena along with distance education instructors and administrators and students on the cutting edge of assessment in computer generated environments.

Clinical Supervision and Professional Development of the Substance Abuse Counselor United States. Department of Health and Human Services, 2009 Clinical supervision (CS) is emerging as the crucible in which counselors acquire knowledge and skills for the substance abuse (SA) treatment profession, providing a bridge between the classroom and the clinic. Supervision is necessary in the SA treatment field to improve client care, develop the professionalism of clinical personnel, and maintain ethical standards. Contents of this report: (1) CS and Prof'l. Develop. of the SA Counselor: Basic info. about CS in the SA treatment field; Presents the 'how to' of CS.; (2) An Implementation Guide for Admin.; Will help admin. understand the benefits and rationale behind providing CS for their program's SA counselors. Provides tools for making the tasks assoc. with implementing a CS system easier. Illustrations.

**A Contemporary Approach to Substance Use Disorders and Addiction Counseling** Ford Brooks, Bill McHenry, 2023 Since our last edition, much has changed in our world. We've lived through and continue to negotiate the consequences of a pandemic, the impact of significant political polarization, racial unrest, gun violence as well as an increase in drug overdoses. These are significant changes in our society which have forced us to examine our approach to clients in need of mental health and addiction services. The use of teletherapy significantly increased during the peak years of the pandemic and continues to be a viable option for clients. The increase in overdoses during the pandemic necessitated the utilization of teletherapy. Access to addiction treatment was limited and face-to-face attendance at support meetings moved to a virtual platform. The need for mental health and addiction services has significantly increased since our last edition and it is our hope this revised

text will contribute to the education and training of counselors in order to meet those needs--

**The Sourcebook for Teaching Science, Grades 6-12** Norman Herr, 2008-08-11 The Sourcebook for Teaching Science is a unique, comprehensive resource designed to give middle and high school science teachers a wealth of information that will enhance any science curriculum. Filled with innovative tools, dynamic activities, and practical lesson plans that are grounded in theory, research, and national standards, the book offers both new and experienced science teachers powerful strategies and original ideas that will enhance the teaching of physics, chemistry, biology, and the earth and space sciences.
