An Aware Consumer B.Vaidyanathan,2017-08-30 Mr. B.Vaidyanathan, a Chemical Engineer by profession, and Chief Mentor, Consumer Protection Council, Rourkela, has been associated with the Indian consumer movement, for well over 30 years and has many achievements to his credit, apart from organising a voluntary consumer organisation in the tribal belt of Odisha. His single handed initiative through the National Consumer Disputes Redressal Commission (NCDRC), against the short-filling of cooking gas refills, resulted in the upgradation of 184 LPG bottling plants of the three Public Sector Oil Companies, M/s IOCL, BPCL and HPCL. Towards this upgradation, the Ministry of Petroleum & Natural Gas, Govt. of India, had to spend over Rs. 300 crores. The mute point is that this upgradation has brought relief to crores of unsuspecting housewives from Kashmir to Kanyakumari. Though the Supreme Court failed to deliver justice, in terms of compensation and punitive damages payable to a voluntary consumer organisation and to the Consumer Welfare Fund, as prescribed in the Consumer Protection Act, his determined zeal to pursue the matter till the filing of the Curative Petition and thereafter, should be an inspiration for all those young people, who have the nerves and the commitment to pursue social goals. Mr. Vaidyanathan has shared his varied experiences in this book, which is a must read not only for the interesting cases narrated therein, but a motivational story, led by an example of 'Never Say Die'. This narrative has been made all the more interesting by sharing informative experiences relating to important consultative bodies and how the activists need to work to ensure delivery and what the government needs to do to protect the consumers better.

This way of education helps a student to grasp the basic concepts and principles. Thus, trying to break the stereotype that subjects like Physics, Chemistry and Biology means studying lengthy formulas, complex structures, and handling complicated instruments, we are trying to make education easy, fun, and enjoyable.

Teaching Chemistry Around the World Björn Risch, 2010 As teachers we often tend to expect other countries to teach chemistry in much the same way as we do, but educational systems differ widely. At Bielefeld University we started a project to analyse the approach to chemical education in different countries from all over the world: Teaching Chemistry around the World. 25 countries have participated in the project. The resulting country studies are presented in this book. This book may be seen as a contribution to make the structure of chemistry teaching in numerous countries more transparent and to facilitate communication between these countries. Especially in the case of the school subject chemistry, which is very unpopular on the one hand and occupies an exceptional position on the other hand - due to its relevance to jobs and everyday life and most notably due to its importance for innovation capacity and problem solving - we have to learn from each others' educational systems.
