Electrotherapy Explained Val Robertson, PhD, Alex Ward, PhD, John Low, Ann Reed, BA, MCSP, DipTP, 2006-05-01 *Electrotherapy Explained* is an excellent research-based exploration of the major types of electrophysical agents used in clinical practice, particularly human and also animal. For the fourth edition, two new authors join the writing team, presenting the latest information for today's clinicians. The text has been completely updated with a major rewrite of the material, particularly that on electrical stimulation. This book continues to focus on evidence: clinical and biophysical evidence that affects how and which electrotherapies may be of use clinically and when. The inclusion of biophysics as well as clinical evidence and principles of application, enables clinicians to move away from traditional 'recipe-based' approaches and rely more on their own clinical reasoning. The focus remains on humans but the relevance of the principles for using and applying

different modalities is explained clearly, providing guidelines for clinicians across disciplines and specialties. Up to date research detailing the evidence both supportive and deprecatory for the use of each modality Written by experts from biophysics and the clinical domains Comprehensive and well referenced Clear and well chosen illustrations elucidate the text Text boxes and summary sections help to break down what is sometimes a complex subject into manageable and memorable chunks Contraindications and risks have been updated in light of the most recent research Three books for the price of one - the website (<http://booksite.elsevier.com/9780750688437>) contains the entire texts of 'Physical Principles Explained' by Low and Reed, and 'Biophysical Bases of Electrotherapy' by Ward. The text directs readers to the website for further reading at relevant points.

Energy Medicine Technologies Finley Eversole, 2013-05-20 New and suppressed breakthroughs in energy medicine, ways to combat toxins and electromagnetic fields, and the importance of non-GMO foods • Explores the use of microcrystals, ozone and hydrogen peroxide therapy, and how to tap in to healing antioxidant electrons from the Earth • Reveals the scientifically proven health risks of genetically modified foods • Examines the suppressed cancer-curing electromedicine of Royal Raymond Rife and Nobel laureate Albert Szent-Györgi Natural, nontoxic, inexpensive, and effective alternatives to conventional medicine exist, yet they have been suppressed by the profit-driven medical-pharmaceutical complex. Presenting a compendium of some of the most revolutionary yet still widely unknown discoveries in health and energy medicine, this book edited by Finley Eversole, Ph.D., explores the use of microcrystals to harmonize the energies of body, mind, and environment; the healing effects of ozone and hydrogen peroxide therapy; ways to combat electromagnetic fields and environmental toxins; sources of disruptive energy that cause stress and health problems, including other people's negative emotions; and how to tap in to healing antioxidant electrons from the Earth. The book reveals the scientifically proven health risks of genetically modified foods--the first irreversible technology in human history with still unknown consequences. It looks at the link between industrial farming and the precipitous rise in heart disease, cancer, diabetes, and Alzheimer's over the past 100 years, providing a 10-point Low-Toxin Program to reduce your risk. It explores the cancer-curing electromedicine of Royal Raymond Rife and its suppression by the medical establishment as well as Nobel laureate Albert Szent-Györgi's follow-up discovery of Frequency Therapy. Offering a window into the holistic future of medicine, the book shows the body not simply as a biological machine to be patched and repaired but as a living organism made up of cells dynamically linked to their inner and outer environments.
