Good Practice In Science Teaching: What Research Has To Say Osborne, Jonathan,Dillon, Justin,2010-05-01 This volume provides a summary of the findings that educational research has to offer on good practice in school science teaching. It offers an overview of scholarship and research in the field, and introduces the ideas and evidence that guide it.

Checking for Understanding Douglas Fisher,Nancy Frey,2015-12-18 A teacher presents a lesson, and at the end asks students if they understand the material. The students nod and say they get it. Later, the teacher is dismayed when many of the students fail a test on the material. Why aren't students getting it? And, just as important, why didn't the teacher recognize the problem? In Checking for Understanding, Douglas Fisher and Nancy Frey show how to increase students' understanding with the help of creative formative assessments. When used regularly, formative assessments enable every teacher to determine what students know and what they still need to learn. Fisher and Frey explore a variety of engaging activities that check for and increase understanding, including interactive writing, portfolios, multimedia presentations, audience response systems, and much more. This new 2nd edition of Checking for Understanding has been updated to reflect the latest thinking in formative assessment and to show how the concepts apply in the context of Fisher and Frey's work on gradual release of responsibility, guided instruction, formative assessment systems, data analysis, and quality instruction. Douglas Fisher and Nancy Frey are the creators of the Framework for Intentional and Targeted (FIT) Teaching™. They are also the authors of numerous ASCD books, including The Formative Assessment Action Plan: Practical Steps to More Successful Teaching and Learning and the best-selling Enhancing RTI: How to Ensure Success with Effective Classroom Instruction and Intervention.

Origin and Evolution of Earth National Research Council,Division on Earth and Life Studies,Board on Earth Sciences and Resources,Committee on Grand Research Questions in the Solid-Earth Sciences,2008-08-04 Questions about the origin and nature of Earth and the life on it have long preoccupied human thought and the scientific endeavor. Deciphering the planet's history and processes could improve the ability to predict catastrophes like earthquakes and volcanic eruptions, to manage Earth's resources, and to anticipate changes in climate and geologic processes. At the request of the U.S. Department of Energy, National Aeronautics and Space Administration, National Science Foundation, and U.S. Geological Survey, the National Research Council assembled a committee to propose and explore grand questions in geological and planetary science. This book captures, in a series of questions, the essential scientific challenges that constitute the frontier of Earth science at the start of the 21st century.

Historical Foundations of Educational Psychology John A. Glover,Royce R. Ronning,2013-11-11 This volume represents a beginning effort to compile a history of educational psychology The project began, innocuously enough, several years ago when we decided to add mon material about the history of educational psychology to the undergraduate course we were teaching. What seemed like a simple task became very complex as we searched in vain for a volume dealing with the topic. We ended up drawing on various histories of psychology that devoted anywhere from a few paragraphs to several pages to the topic and on a very few articles addressing the issue. We were startled, frankly, by the apparent lack of interest in the history of our field and decided to attempt to compile a history ourselves. As is the case with any edited volume, the contributing authors deserve credit for its positive features. They uniformly made every effort asked of them and taught us much about educational psychology. Any errors or omissions are our responsibility alone.

The Gold Cadillac Mildred D. Taylor,1998-02-01 Another powerful story in the Logan Family Saga and companion to Mildred D. Taylor's Newbery Award-winning Roll of Thunder, Hear My Cry. A drive South becomes dangerous for 'lois and her family. 'Lois and Wilma are proud of their father's brand-new gold Cadillac, and excited that the family will be driving it all the way from Ohio to Mississippi. But as they travel deeper into the rural South, there are no admiring glances for the shiny new car; only suspicion and anger for the black man behind the wheel. For the first time in their lives, Lois and her sister know what it's like to feel scared because of the color of their skin. A personal, poignant look at a black child's first experience with institutional racism.--The New York Times

501 Grammar and Writing Questions Learning Express LLC,2006 Many of us grimace when faced with grammar exercises. But in order to communicate with others, pass tests, and get your point across in writing, using words and punctuation effectively is a necessary skill. It's a fact that in our life today, good communication skills-including writing-are essential. The good news is that grammar and writing skills can be developed with practice.

Concise Encyclopedia of Educational Linguistics B. Spolsky,R. E. Asher,1999-09-03 The volume comprises 232 thematically organised articles based on the highly successful Encyclopedia of Language & Linguistics and the International Encyclopedia of Education (2nd edition) revised and, where necessary, updated and supplemented throughout. Dealing with all topics at the intersection between education and language, the work will prove an invaluable reference for all researchers in the field. Never has there been more intense debate over different attitudes and approaches to teaching and language. This volume will provide a state of the art description of all the topics of interest to language educators and all those concerned with making and implementing policy in language

education. Fundamental topics include: the social context, society, national, school and curricular policy, literacy and oracy, language acquisition, bi- and plurilingualism, testing, TEFL, TESOL, SLA.

Representation Learning for Natural Language Processing Zhiyuan Liu,Yankai Lin,Maosong Sun,2020-07-03 This open access book provides an overview of the recent advances in representation learning theory, algorithms and applications for natural language processing (NLP). It is divided into three parts. Part I presents the representation learning techniques for multiple language entries, including words, phrases, sentences and documents. Part II then introduces the representation techniques for those objects that are closely related to NLP, including entity-based world knowledge, sememe-based linguistic knowledge, networks, and cross-modal entries. Lastly, Part III provides open resource tools for representation learning techniques, and discusses the remaining challenges and future research directions. The theories and algorithms of representation learning presented can also benefit other related domains such as machine learning, social network analysis, semantic Web, information retrieval, data mining and computational biology. This book is intended for advanced undergraduate and graduate students, post-doctoral fellows, researchers, lecturers, and industrial engineers, as well as anyone interested in representation learning and natural language processing.
