Mathematics of Keno and Lotteries Mark Bollman,2018-04-17 Mathematics of Keno and Lotteries is an elementary treatment of the mathematics, primarily probability and simple combinatorics, involved in lotteries and keno. Keno has a long history as a high-advantage, high-payoff casino game, and state lottery games such as Powerball are mathematically similar. MKL also considers such lottery games as passive tickets, daily number drawings, and specialized games offered around the world. In addition, there is a section on financial mathematics that explains the connection between lump-sum lottery prizes (as with Powerball) and their multi-year annuity options. So-called winning systems for keno and lotteries are examined mathematically and their flaws identified.

Dream a Lottery Win Tonight Larry Vingelman, 2013-10-27 When I host book signings and give lectures on lottery prediction, people always ask, If lotteries are random draws, how can they be predicted? I always answer the same way. Lotteries are predictable because we have the ability to redirect subtle energy. With about 20 to 30 people present, I always ask how many are familiar with subtle energies. No one has ever raised their hand. And, why should they! It's only been within the last 30 to 40 years that Science discovered subtle energies and their role in manifesting human desire. It's only been within the last 10 years that this research and experimentation has been available to the general public in books like Lynne McTaggart's *The Intention Experiment* or Dr. Tiller's *Conscious Acts of Creation*. As a matter of fact, it has only been this year (2013) that Dr. Peter Higgs won the Nobel Prize for his work on the God Particle. The first subtle energy particle

ever found at the new CERN accelerator. With these discoveries and experiments on the redirection of subtle energy, Scientists believe that a new technology has been born. Significantly more powerful than electromagnetic energy, significantly more powerful than nuclear energy, subtle energy technology will bring about new ways for human populations to interact, and new ways to communicate. It will significantly change our health care industry and influence the movement towards world peace. Most interesting, are the time and space attributes of subtle energy that allow the human mind to predict the future and consequently win lotteries. In the science of Quantum Mechanics, experimenting at the level of subtle energy, scientists found that their observations were affecting the outcome of the experiments. Somehow, the experimenter's consciousness was having an effect on our everyday reality of atoms and elements. This led to other experiments many concerning time displacement. As it turns out, subtle energy does not conform to the way you and I experience sequential time. Subtle energy is unbound by time and space - giving it predictive potential. A few daring researchers now understand subtle energy to be a vast field of potential energy supporting our everyday reality and somehow this energy is intimately interconnected with our minds. Consequently, at this stage of subtle energy technology research, researchers are studying ways that the mind can amplify subtle energies to manifest human desires for better health, wealth and abundance, world peace, lasting vitality, and prophetic vision. Dream a Lottery Win Tonight, specializes in the application of subtle energy and its prophetic vision attributes. We accomplish this by activating an energized intention near the mind's source of subtle energy. In this way, we amplify the intention to win a lottery. Of course, we could amplify any intention including those for better health or world peace. We decided on lottery prediction not because it was easy but because it was difficult and because the results are quantitative not subjective. In developing the skill of prophetic vision to win a lottery, we use an energized intention activated as close to the mind's Source of subtle energy as possible. To get close to the Source, we use mantras. These mantras resonate frequencies that are specific to the results we seek. In this case, we use the Lakshmi Mantra, used since antiquity to enhance ones abilities at games of chance. Once close to the source, we activate an energized intention. The intention is energized with emotion and bright sense visualizations. We perform this meditation just before retiring enhancing our dreams allowing us to predict a winning number. In this way, we use subtle energies to win the lottery. Larry Vingelman Author

A Patriot's History of the United States Larry Schweikart, Michael Patrick Allen, 2004-12-29 For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States

corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.
