*The Palgrave Handbook of Government Budget Forecasting* Daniel Williams,Thad Calabrese,2019-10-14 This Handbook is a comprehensive anthology of up-to-date chapters contributed by current researchers in budget forecasting. Editors Daniel Williams and Thad Calabrese had previously found substantial deficiencies in public budgeting forecast literature with current research failing to address such matters as practices related to forecasting expenditure factors, the consequences of forecast bias, or empirical examination of the effectiveness of many deterministic methods actually used by many governments. This volume comprehensively addresses the state of knowledge about budget forecasting for practitioners, academics, and students and serves as a comprehensive resource for instruction alongside serving as a reference book for those engaged in budget forecasting practice.

**Expenditure Conditionality in IMF-supported Programs** Mr.Sanjeev Gupta,Michela Schena,Mr.Reza Yousefi,2018-12-07 This paper studies the impact of expenditure conditionality in IMF programs on the composition of public spending. A granular dataset on different government expenditure conditions covering 115 countries for the 1992-2016 period is compiled. The results support the view that while conditionality on specific elements of spending could help achieve a program's short-term objectives, it is structural conditionality which delivers lasting benefits. Structural public financial management conditionality (such as on budget execution and control) has proven to be effective in boosting the long-term level of education, health, and public investment expenditures. The results further indicate that conditionality on raising such spending may come at the expense of other expenditures. Finally, the successful implementation (and not mere existence) of the conditionality is crucial for improved outcomes. These findings are relevant for policy makers targeting achievement of the Sustainable Development Goals (SDGs).

**Budgeting for Outcomes** David Osborne,2013-07-01 Governments are facing a permanent fiscal crisis. The costs of running governments are rising, especially the costs to educate, incarcerate, and medicate.

Consequently, government is broke. Traditional budgeting only makes matters worse. The focus (and the acrimony) settles on the small percentages to cut, but the great majority of spending escapes examination. Budgeting for Outcomes: Better Results for the Price of Government changes this equation. It asks different questions—and gets very different answers. This e-book explains how local governments can create a budget designed to give residents the results they really want and need—at a price they are willing to pay.
