**Michael Grenfell**

Language, Ethnography, and Education Michael Grenfell, David Bloome, Cheryl Hardy, Kate Pahl, Jennifer Rowsell, Brian V Street, 2013-06-17 This frontline volume contributes to the social study of education in general and literacy in particular by bringing together in a new way the traditions of language, ethnography, and education. Integrating New Literacy Studies and Bourdieusian sociology with ethnographic approaches to the study of classroom practice, it offers an original and useful reference point for scholars and students of education, language, and literacy wishing to incorporate Bourdieu's ideas into their work. More than just a set of stand-alone chapters around social perspectives on language interactions in classrooms, this book develops and unfolds dialogically across three sections: Bridging New Literacy Studies and Bourdieu - Principles; Language, Ethnography and Education - Practical Studies; Working at the Intersections - In Theory and Practice. The authors posit 'Classroom Language Ethnography' as a genuinely new perspective with rich and developed traditions behind it, but distinct from conventional approaches to literacy and education — an approach that bridges those traditions to yield fresh insights on literacy in all its manifestations, thereby providing a pathway to more robust research on language in education.

**Critical Ethnography and Education** Katie Fitzpatrick, Stephen May, 2022-04-28 In this book, Fitzpatrick and May make the case for a reimagined approach to critical ethnography in education. Working with an expansive understanding of critical, they argue that many researchers already do the kind of critical ethnography suggested in this book, whether they call their studies critical or not. Drawing on a wide range of educational studies, the authors demonstrate that a methodology that is lived, embodied, and personal—and fundamentally connected to notions of power—is essential to exploring and understanding the many social and political issues facing education today. By grounding studies in work that reimagines, troubles, and questions notions of power, injustice, inequity, and marginalization, such studies engage with the tenets of critical ethnography. Offering a wide-ranging and insightful commentary on the influences of critical ethnography over time, Fitzpatrick and May interrogate the ongoing theoretical developments, including poststructuralism, postcolonialism, and posthumanism. With extensive examples, excerpts, and personal discussions, the book thus repositions critical ethnography as an expansive, eclectic, and inclusive methodology that has a great deal to offer educational inquiries. Overviewing theoretical and methodological arguments, the book provides insight into issues of ethics and positionality as well as an in-depth focus on how ethnographic research illuminates such topics as racism, language, gender and sexuality in educational settings. It is essential reading for students, scholars, and researchers in qualitative inquiry, ethnography, educational anthropology, educational research methods, sociology of education, and philosophy of education.

Bourdieu, Language-based Ethnographies and Reflexivity Michael Grenfell, Kate Pahl, 2018-10-31 Offering a unique and original perspective on Bourdieu, language-based ethnographies, and reflexivity, this volume provides a nuanced, in-depth discussion of the complex relationship between these interconnected topics and their impact in real-world contexts. Part I opens the book with an overview of the historical background and development of language-based ethnographic research and Bourdieu's work in this space. Part II presents a series of case studies that highlight a Bourdieusian perspective and demonstrate how reflexivity impacts language-based ethnography. In each study, Bourdieu's conceptual framework of reflexively-informed objectivity examines the ways in which the studies themselves were constructed and understood. Building on Parts I and II, the concluding set of chapters in Part III unpacks the messiness of the theory and practice of language-based ethnography, and provides insights into what reflexivity means for Bourdieu and in practical contexts. Arguing for a greater reflexive understanding in research practice, this volume sets an agenda for future literacy and

language research.

**Research Anthology on Bilingual and Multilingual Education** Management Association, Information Resources,2021-10-29 Given the boost in global immigration and migration, as well as the emphasis on creating inclusive classrooms, research is turning to the challenges that teachers face with the increasing need for bilingual and multilingual education. The benefits of bilingual education are widespread, allowing students to develop important cognitive skills such as critical thinking and problem solving as well as opening further career opportunities later in life. However, very few resources are available for the successful practice and implementation of this education into the curriculum, with an even greater lack of appropriate cultural representation in the classroom. Thus, it is essential for educators to remain knowledgeable on the emerging strategies and procedures available for making bilingual and multilingual education successful. The Research Anthology on Bilingual and Multilingual Education is a comprehensive reference source on bilingual and multilingual education that offers the latest insights on education strategy and considerations on the language learners themselves. This research anthology features a diverse collection of authors, offering valuable global perspectives on multilingual education. Covering topics such as gamification, learning processes, and teaching models, this anthology serves as an essential resource for professors, teachers, pre-service teachers, faculty of K-12 and higher education, government officials, policymakers, researchers, and academicians with an interest in key strategy and understanding of bilingual and multilingual education.

**Handbook of Research on Bilingual and Intercultural Education** Gómez-Parra, María Elena,Huertas Abril, Cristina Aránzazu,2020-03-27 As education becomes more globally accessible, the need increases for comprehensive education options with a special focus on bilingual and intercultural education. The normalization of diversity and the acclimation of the students to various cultures and types of people are essential for success in the current world. The Handbook of Research on Bilingual and Intercultural Education is an essential scholarly publication that provides comprehensive empirical research on bilingual and intercultural processes in an educational context. Featuring a range of topics such as education policy, language resources, and teacher education, this book is ideal for teachers, instructional designers, curriculum developers, language learning professionals, principals, administrators, academicians, policymakers, researchers, and students.

**Writing Changes: Alphabetic Text and Multimodal Composition** Pegeen Reichert Powell,2020-04-01 Writing Changes moves beyond restrictive thinking about composition to examine writing as a material and social practice rich with contradictions. It analyzes the assumed dichotomy between writing and multimodal composition (which incorporates sounds, images, and gestures) as well as the truism that all texts are multimodal. Organized in four sections, the essays explore • alphabetic text and multimodal composition in writing studies • specific pedagogies that place writing in productive conversation with multimodal forms • current representations of writing and multimodality in textbooks, of instructors'

attitudes toward social media, and of writing programs • ideas about writing studies as a discipline in the light of new communication practices Bookending the essays are an introduction that frames the collection and establishes key terms and concepts and an epilogue that both sums up and complicates the ideas in the essays.

**Longitudinal Interactional Histories** Amanda K. Kibler, 2018-10-31 This book explores the lives of five Mexican immigrant-origin youths in the United States, documenting their language and literacy journeys over an eight-year period from adolescence to young adulthood. In these qualitative case studies, the author uses a “longitudinal interactional histories approach” (LIHA) to explore literacy events in which the young people participated over time, telling the stories behind texts they created in order to better understand opportunities for bilingual and biliterate development available inside and outside of formal schooling. The book begins with an overview and exploration of theories and research underpinning the project, with a focus on countering minoritizing discourses faced by many multilingual immigrant youth and prioritizing the “goodness” of their experiences. The study’s methodology, including LIHA, is presented, before individual case studies of all five youth are explored. The book closes with a synthesis of these cases and exploration of pedagogical, policy, and research implications. It will be of particular interest to students and scholars of education, applied linguistics and sociolinguistics, as well as teachers and policy-makers working with bilingual and biliterate immigrant youth.

Rethinking Rural Literacies Michael Corbett,2013-06-12 The chapters in this international collection investigate a wide range of theorizations of rurality and literacy; literate practices and pedagogies; questions of place, space, and sustainability; and representations of rurality that challenge simplistic conceptions of standardized literacy and the real-and-imagined world beyond the metropolis.

*Literacy in the Lives of Working-Class Adults in Australia* Stephen Black,2023-12-14 Adopting a 'social practice' approach to literacy research based on ethnographic methods, this book provides a strong critique of dominant understandings of the role of literacy in the lives of adults in Australia. It explores how groups of working-class adults can manage the literacy practices of their everyday lives by drawing on social networks of support. It is based on research conducted by the author over a forty-year career in adult literacy education, featuring the voices of varied adult groups, including: prisoners, the long-term unemployed, local council workers, manufacturing workers, adult literacy students, marginalised young people, vocational students, and patients living with a chronic illness (type 2 diabetes). Each chapter explains how dominant society views these adult groups in relation to literacy, and provides a qualitative examination at the local level of how members of these groups manage the literacy practices of their everyday lives.

Educational Leadership and Pierre Bourdieu Pat Thomson,2016-11-03 Pierre Bourdieu was one of the most important thinkers of the twentieth century. He argued for, and practiced, rigorous and reflexive scholarship, interrogating the inequities and injustices of modern societies. Through a lifetime's explication of the ways in which schooling both produces and reproduces the status quo, Bourdieu offered a powerful critique and method of analysis of the history of schooling, and of contemporary educational policies and trends. Though frequently used in educational research, Bourdieu's work has had much less take up in Educational Leadership, Management and Administration. Educational Leadership and Pierre Bourdieu argues that ELMA scholars have much to gain by engaging more thoroughly with his work. The book explains each of the key terms in Bourdieu's thinking tool kit, showing how the tripartite concepts of field, habitus and capitals offer a way through which to understand the interaction of structure and agency, and the limits on the freedom of an individual - in this case an educational leader - to act. Educational Leadership and Pierre Bourdieu offers an analysis of dominant trends in ELMA research, examining the kinds of questions asked, projects undertaken and methods used. It provides alternative questions and methods based on a Bourdieusian approach, further readings and a range of exemplars of the application of these tools. The book will be of interest to those whose primary focus is the utility of Bourdieu's social theory.

**The Routledge Handbook of English Language Studies** Philip Seargeant,Ann Hewings,Stephen Pihlaja,2018-07-06

The Routledge Handbook of English Language Studies provides a comprehensive overview of English Language Studies. In 30 chapters written by leading scholars from around the world, this Handbook covers and critically examines: English Language Studies as a discipline that is changing and evolving in response to local and global pressures; definitions of English, including world Englishes, contact Englishes, and historical and colonial perspectives; the relevance of English in areas such as teaching, politics and the media; analysis of English situated in wider linguistics contexts, including psycholinguistics, sociolinguistics and linguistic ethnography. The Routledge Handbook of English Language Studies is essential reading for researchers and students working in fields related to the teaching and study of the English language in any context.

*Unsettling Literacies* Claire Lee,Chris Bailey,Cathy Burnett,Jennifer Rowsell,2022-03-04 This book asks researchers what uncertainty means for literacy research, and for how literacy plays through uncertain lives. While the book is not focused only on COVID-19, it is significant that it was written in 2020-2021, when our authors' and readers' working and personal lives were thrown into disarray by stay-at-home orders. The book opens up new spaces for examining ways that literacy has come to matter in the world. Drawing on the reflections of international literacy researchers and important new voices, this book presents re-imagined methods and theoretical imperatives. These difficult times have surfaced new communicative practices and opened out spaces for exploration and activism, prompting re-examination of relationships between research, literacy and social justice. The book considers varied and consequential events to explore new ways to think and research literacy and to unsettle what we know and accept as fundamental to literacy research, opening ourselves up for change. It provides direction to the field of literacy studies as pressing global concerns are prompting literacy researchers to re-examine what and how they research in times of precarity.

**Super Skills, Super Reading** Perry Dantzler,2020-12-25 What comes to mind when you think about superheroes? Strength, bravery, and heroism are common answers. However, superheroes do not only have physical strength, but they also have mental strengths and skills. Superheroes tend to have intelligence and detection skills which allow them to develop other skills. In this analysis of superhero literacy aimed at students, the connection between superhero media and larger theories of literacy are explored. The author uses six superhero television shows to show how literacy is portrayed in superhero media and how it reflects and shapes cultural ideas of literacy. The shows covered are Arrow, The Flash, Gotham, Jessica Jones, Luke Cage and Daredevil.
