**The Land is a Map** Luise Hercus,Flavia Hodges,Jane Simpson,2009-03-01 The entire Australian continent was once covered with networks of Indigenous placenames. These names often evoke important information about features of the environment and their place in Indigenous systems of knowledge. On the other hand, placenames assigned by European settlers and officials are largely arbitrary, except for occasional descriptive labels such as 'river, lake, mountain'. They typically commemorate people, or unrelated places in the Northern hemisphere. In areas where Indigenous societies remain relatively intact, thousands of Indigenous placenames are used, but have no official recognition. Little is known about principles of forming and bestowing Indigenous placenames. Still less is known about any variation in principles of placename bestowal found in different Indigenous groups. While many Indigenous placenames have been taken into the official placename system, they are often given to different features from those to which they originally applied. In the process, they have been cut off from any understanding of their original meanings. Attempts are now being made to ensure that additions of Indigenous placenames to the system of official placenames more accurately reflect the traditions they come from. The eighteen chapters in this book range across all of these issues. The contributors (linguistics, historians and anthropologists) bring a wide range of different experiences, both academic and practical, to their contributions. The book promises to be a standard reference work on Indigenous placenames in Australia for many years to come.

**Concrete Jungle** Niles Eldredge,Sidney Horenstein,2014-10-23 If they are to survive, cities need healthy chunks of the world's ecosystems to persist; yet cities, like parasites, grow and prosper by local destruction of these very ecosystems. In this absorbing and wide-ranging book, Eldredge and Horenstein use New York City as a microcosm to explore both the positive and the negative sides of the relationship between cities, the environment, and the future of global biodiversity. They illuminate the mass of contradictions that cities present in embodying the best and the worst of human existence. The authors demonstrate that, though cities have voracious appetites for resources such as food and water, they also represent the last hope for conserving healthy remnants of the world's ecosystems and species. With their concentration of human beings, cities bring together centers of learning, research, government, finance, and media—institutions that increasingly play active roles in solving environmental problems. Some of the topics covered in Concrete Jungle: --The geological history

of the New York region, including remnant glacial features visible today --The early days of urbanization on Manhattan Island, focusing on the history of Central Park, Collect Pond, and Manhattan Square --The history of early railway lines and the development of New York's iconic subway system --The problem of producing enough safe drinking water for an ever-expanding population --Prominent civic institutions, including universities, museums, and zoos

where The Outback Meets The Sea Whyalla Writers' Group,2016-10-03 This is a collection of stories and poems on the theme of Whyalla: its past, present and future.--Back cover.

**Cycling Futures** Jennifer Bonham, Marilyn Johnson,2015-12-04 The focus of the first half of the book is largely on the current engagement with cycling, challenges faced by existing and would-be cyclists and the issues cycling might address. The second half of the book is concerned with strategies and processes of change. Contributors working from different ontological positions reflect on changing socio-spatial relations to enable the broadest possible participation in cycling.

*Discovering Matthew* Vivienne Freestone,2022-02-20 Matthew is a boy out of place in the world, and he doesn't know why. Can he find his place and space to be the person he knows he can be? Michael is a man for whom life has always been hard work. Even though he has a great job, and seemed to have everything he wanted - a family, a loving wife - he has somehow lost the very best of that life and doesn't understand why. Jeannie has worked hard to love the important people in her life, but now she needs a complete change - moving to a rural area, starting again. Can she make it work, and can she find love again? Will the reasons for that move eventually catch up with her and her family? Will it take a disaster to bring them together, or will the consequences of that disaster be far reaching?

Urban Geography Griffith Taylor,2013-06-17 This book is divided into three parts. The first deals with typical settlements in each of the seven continents, the early stages of settlements, land surveys and general phases of town evolution. The second part discusses changes in site and pattern, from Neolithic to modern times. The third part specializes in topographic and functional controls in modern towns. Chapters on Planning, Regional Surveys and Classification of towns close the book. There are about 300 specially drawn plans and diagrams of towns - which should appeal to the sociologist and town planner as well as to every serious student of geography. This book was first published in 1949.

Onkaparinga Heritage Gordon Young,1988 The Onkaparinga district is an area east of Adelaide in the Adelaide Hills, and includes the communities of Lobethal, Woodside, Lenswood, Oakbank, Balhannan and Verdun.
