Drake's Road Book of the Grand Junction Railway from Birmingham to Liverpool and Manchester active 1825 James Drake, 2019-12-04 James Drake's 'Drake's Road Book of the Grand Junction Railway from Birmingham to Liverpool and Manchester' is a comprehensive guide to the newest mode of transportation in the early 19th century. The book not only provides practical information for travelers, such as distances and landmarks along the railway route, but also includes detailed descriptions of the towns and cities connected by the railway. Drake's writing style is straightforward and informative, catering to the practical needs of travelers. This book is a valuable resource for understanding the impact of the railway on society and commerce during the Industrial Revolution. Drake's detailed observations and meticulous descriptions offer a glimpse into the rapidly changing landscape of Britain in the 19th century. Historians and enthusiasts of railway history will find this book an essential addition to their collection. James Drake's expertise as a cartographer and travel writer is evident in this meticulously researched and well-presented guide, making it a must-read for those interested in the history of transportation and urban development.

The Land is a Map Luise Hercus, Flavia Hodges, Jane Simpson, 2009-03-01 The entire Australian continent was once covered with networks of Indigenous placenames. These names often evoke important information about features of the environment and their place in Indigenous systems of knowledge. On the other hand, placenames assigned by European settlers and officials are largely arbitrary, except for occasional descriptive labels such as 'river, lake, mountain'. They typically commemorate people, or unrelated places in the Northern hemisphere. In areas where Indigenous societies remain relatively intact, thousands of Indigenous placenames are used, but have no official recognition. Little is known about principles of forming and bestowing Indigenous placenames. Still less is known about any variation in principles of placename bestowal found in different Indigenous groups. While many Indigenous placenames have been taken into the official placename system, they are often given to different features from those to which they originally applied. In the process, they have been cut off from any understanding of their original meanings. Attempts are now being made to ensure

that additions of Indigenous placenames to the system of official placenames more accurately reflect the traditions they come from. The eighteen chapters in this book range across all of these issues. The contributors (linguistics, historians and anthropologists) bring a wide range of different experiences, both academic and practical, to their contributions. The book promises to be a standard reference work on Indigenous placenames in Australia for many years to come.

Concrete Jungle Niles Eldredge, Sidney Horenstein, 2014-10-23 If they are to survive, cities need healthy chunks of the world's ecosystems to persist; yet cities, like parasites, grow and prosper by local destruction of these very ecosystems. In this absorbing and wide-ranging book, Eldredge and Horenstein use New York City as a microcosm to explore both the positive and the negative sides of the relationship between cities, the environment, and the future of global biodiversity. They illuminate the mass of contradictions that cities present in embodying the best and the worst of human existence. The authors demonstrate that, though cities have voracious appetites for resources such as food and water, they also represent the last hope for conserving healthy remnants of the world's ecosystems and species. With their concentration of human beings, cities bring together centers of learning, research, government, finance, and media—institutions that increasingly play active roles in solving environmental problems. Some of the topics covered in *Concrete Jungle*: --The geological history of the New York region, including remnant glacial features visible today --The early days of urbanization on Manhattan Island, focusing on the history of Central Park, Collect Pond, and Manhattan Square --The history of early railway lines and the development of New York's iconic subway system --The problem of producing enough safe drinking water for an ever-expanding population --Prominent civic institutions, including universities, museums, and zoos

The New Urban Frontier Neil Smith, 2005-10-26 Why have so many central and inner cities in Europe, North America and Australia been so radically revamped in the last three decades, converting urban decay into new chic? Will the process continue in the twenty-first century or has it ended? What does this mean for the people who live there? Can they do anything about it? This book challenges conventional wisdom, which holds gentrification to be the simple outcome of new middle-class tastes and a demand for urban living. It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century. Documenting in gritty detail the conflicts that gentrification brings to the new urban 'frontiers', the author explores the interconnections of urban policy, patterns of investment, eviction, and homelessness. The failure of liberal urban policy and the end of the 1980s financial boom have made the end-of-the-century

city a darker and more dangerous place. Public policy and the private market are conspiring against minorities, working people, the poor, and the homeless as never before. In the emerging revanchist city, gentrification has become part of this policy of revenge.

Improvising Theory Allaine Cerwonka, Liisa H. Malkki, 2008-11-15 Scholars have long recognized that ethnographic method is bound up with the construction of theory in ways that are difficult to teach. The reason, Allaine Cerwonka and Liisa H. Malkki argue, is that ethnographic theorization is essentially improvisatory in nature, conducted in real time and in necessarily unpredictable social situations. In a unique account of, and critical reflection on, the process of theoretical improvisation in ethnographic research, they demonstrate how both objects of analysis, and our ways of knowing and explaining them, are created and discovered in the give and take of real life, in all its unpredictability and immediacy. Improvising Theory centers on the year-long correspondence between Cerwonka, then a graduate student in political science conducting research in Australia, and her anthropologist mentor, Malkki. Through regular e-mail exchanges, Malkki attempted to teach Cerwonka, then new to the discipline, the basic tools and subtle intuition needed for anthropological fieldwork. The result is a strikingly original dissection of the processual ethics and politics of method in ethnography.

Discovering Matthew Vivienne Freestone, 2022-02-20 Matthew is a boy out of place in the world, and he doesn't know why. Can he find his place and space to be the person he knows he can be? Michael is a man for whom life has always been hard work. Even though he has a great job, and seemed to have everything he wanted - a family, a loving wife - he has somehow lost the very best of that life and doesn't understand why. Jeannie has worked hard to love the important people in her life, but now she needs a complete change - moving to a rural area, starting again. Can she make it work, and can she find love again? Will the reasons for that move eventually catch up with her and her family? Will it take a disaster to bring them together, or will the consequences of that disaster be far reaching?

Touring Atlas of Australia 29th Ed UBD Gregory's, 2021-06-02 Whether heading off on a weekend getaway or travelling anywhere throughout this vast country, this is the go-to atlas, an essential for any Australian road trip. With sales of over a million copies, the Touring Atlas of Australia is a consistent performer and is the best large-format road atlas in the country. Creative Industries and Urban Development Terry Flew,2013-10-31 The concept of creative industries has developed considerable academic and policy momentum in the 21st century. There has been a connection identified between the rise of creative industries and the urbanisation of the world's population, particularly in relation to the significance of cities as sites of cultural production and consumption. Much of the work on creative industries and cities, however, has drawn upon 'imagined geographies' about the relationship between creativity and place. This collection draws together contributions that critically appraise recent urban cultural policy discourses, as well as reflecting on the role of culture and creative industries in the future development of cities. This book is based on a special issue of *The Information Society: An International Journal*.
