**Analysis of 18th- and 19th-Century Musical Works in the Classical Tradition** David Beach, Ryan McClelland, 2012-05-04 Analysis of 18th- and 19th-Century Musical Works in the Classical Tradition is a textbook for upper-level undergraduate and graduate courses in music analysis. It outlines a process of analyzing works in the Classical tradition by uncovering the construction of a piece of music—the formal, harmonic, rhythmic, and voice-leading organizations—as well as its unique features. It develops an in-depth approach that is applied to works by composers including Haydn, Mozart, Beethoven, Schubert, Schumann, and Brahms. The book begins with foundational chapters in music theory, starting with basic diatonic harmony and progressing rapidly to more advanced topics, such as phrase design, phrase expansion, and chromatic harmony. The second part contains analyses of complete musical works and movements. The text features over 150 musical examples, including numerous complete annotated scores. Suggested assignments at the end of each chapter guide students in their own musical analysis.

**Performance insights for Mozart piano sonatas derived from eighteenth-century compositional guides** Sharon J. Hudson, 2010 This thesis uses ideas found in the eighteenth-century composition guides of Joseph Riepel, Heinrich Christoph Koch, Anton Reicha and Johann Friedrich Daube to gain insight into the musical language found in the Mozart sonatas K. 281, 333, 457 and 576. The contemporaneous concepts of the phrase punctuation, expansion and extension, phrase hierarchy, logical relations, and topics forms the basis of the analyses. Insights from the analysis lead to suggestions for performance related to tempos, dynamic changes, phrase separation, pauses, hierarchy of stresses, and other musical elements. The analyses offer more dramatic possibilities of expression, supplementing the innate communicative ability of the performer.

The Analysis and Cognition of Melodic Complexity Eugene Narmour, 1992-11 In this work, Eugene Narmour extends the unique theories of musical perception presented in *The Analysis and Cognition of Basic Melodic Structures*. The two books together constitute the first comprehensive theory of melody founded on psychological research. Narmour's earlier study dealt with cognitive relations between melodic tones at their most basic level. After summarizing the formalized methodology of the theory described in that work, Narmour develops an elaborate and original symbology to show how sixteen archetypes can combine to form some 200 complex structures that, in turn, can chain together in a theoretically infinite number of ways. He then explains and speculates on the cognitive operations by which listeners assimilate and ultimately encode these complex melodic structures. More than 250 musical examples from different historical periods and non-Western cultures demonstrate the panstylistic scope of Narmour's model. Of particular importance to music theorists and music historians is Narmour's argument that melodic analysis and formal analysis, though often treated separately, are in fact indissolubly linked. *The Analysis and Cognition of Melodic Complexity* will also appeal to ethnomusicologists, psychologists, and cognitive scientists.

**A Descriptive Analysis of Mozart Piano Sonata** Lai Mee Yuae, Young-Hwan Yeo, 2012-06 This musical analysis is mainly to explore the musical form of the piece, Piano Sonata in Bb major, K. 333, first movement by Wolfgang Amadeus Mozart. The purpose of this analysis is to reveal the design and harmonic organization of this piece. Besides that, the techniques that contribute to the continuous unbroken flow of musical ideas in the piece are examined. Finally, the interplay between tension and relaxation happened in the piece is discussed too. Score analysis and observation technique are applied in this study. The phrase structural organization is fundamental in this analysis. Examination of musical elements like harmony and melody is done from phrase to phrase. It is discovered that the technique of opposing ideas, repetition, sequence, and motivic development, and motivic variation have contributed to the flow of musical ideas in this composition. The thematic relationship and motivic relationship between segments has shown the continuity and unity within the whole composition.

Musical Form and Analysis Glenn Spring, Jere Hutcheson, 2013-08-29 Understanding the way music unfolds to the listener is a major key for unlocking the secrets of the composer's art. Musical Form and Analysis, highly regarded and widely used for two decades, provides a balanced theoretical and philosophical approach that helps upper-level undergraduate music majors understand the structures and constructions of major musical forms. Spring and Hutcheson present all of the standard topics expected in such a text, but their approach offers a unique conceptual thrust that takes readers beyond mere analytical terminology and facts. Evocative rather than encyclopedic, the text is organized around three elements at work at all levels of music: time, pattern, and proportion. Well-chosen examples and direct, well-crafted assignments reinforce techniques. A 140-page anthology of music for in-depth analysis provides a wide range of carefully selected works.

*Modulation in Beethoven's Sonatas* Jaime Kardontchik, 2018-04-20 How did he do it? As when one stands in front of a great novel or mystery book, this question comes to mind when listening to Beethoven's music. Why do his piano sonatas sound so different from Haydn's and Mozart's sonatas? What rules did he follow when he wrote them? Can we discern any patterns? What could a young musician learn from Beethoven's writing style that he/she could then use to compose her/his own music? Have the scores on hand, listen to a recording. And as you read the book, sit from time to time at the piano and try your own variations on Beethoven's ideas, a few bars at a time. Write them down in your own sketch book. Who knows? Perhaps, one day some of them will become the seeds from which you will write your own music. In ways you never thought before.
