Task-Based Language Learning – Insights from and for L2 Writing Heidi Byrnes,Rosa M. Manchón,2014-11-14 The book seeks to enlarge the theoretical scope, research agenda, and practices associated with TBLT in a two-way dynamic, by exploring how insights from writing might reconfigure our understanding of tasks and, in turn, how work associated with TBLT might benefit the learning and teaching of writing. In order to enrich the domain of task and to advance the educational interests of TBLT, it adopts both a psycholinguistic and a textual meaning-making orientation. Following an issues-oriented introductory chapter, Part I of the volume explores tenets, methods, and findings in task-oriented theory and research in the context of writing; the chapters in Part II present empirical findings on task-based writing by investigating how writing tasks are implemented, how writers differentially respond to tasks, and how tasks can contribute to language development. A coda chapter summarizes the volume's contribution and suggests directions for advancing TBLT constructs and research agendas.

The Oxford Handbook of Personnel Assessment and Selection Neal Schmitt,2013-12-15 Employee selection has long stood at the practical forefront of industrial/organizational psychology. Today's social, business, and economic climates require ongoing adaptations by those who select organizations' personnel, and research on the topic helps gauge the impact of these adaptations and their implications for human performance and potential. The Oxford Handbook of Personnel Assessment and Selection codifies the wealth of new research surrounding employee selection (web-based assessments, social networking, globalization of organizations), situating them alongside more traditional practices to establish the best and most relevant research for both professionals and academics. Comprising chapters from authors in both the private sector and academia, this volume is organized into seven parts: (1) historical and social context of the field of assessment and selection; (2) research strategies; (3) individual difference constructs that underlie effective performance; (4) measures of predictor constructs; (5) employee performance and outcome assessment; (6) societal and organizational constraints on selection practice; and (7) implementation and sustainability of selection systems. While providing a comprehensive review of current research and practice, the purpose of this handbook is to provide an up-to-date profile of each of the areas addressed and highlight current questions that deserve additional attention from researchers and practitioners. This compendium is essential reading for industrial/organizational psychologists and human resource managers.

The Strategy Factor in Successful Language Learning Carol Griffiths,2013-05-09 This book addresses fundamental questions regarding the relationships between successful language learning and strategy use and development according to learner, situational or target variables. It considers strategy effectiveness from an individual point of view and discusses pedagogical issues, especially relating to teacher perceptions and training, classroom and learner factors, methodology and content. The book begins by discussing underlying theoretical issues and then presents evidence from empirical studies; in addition to presenting a quantitative view, the book also takes a qualitative look at strategy use by individuals. Rather than focusing on strategies divorced from the 'real world' of the classroom, this book explores the issues from the teaching/learning point of view.

Recent Tools for Computer- and Mobile-Assisted Foreign Language Learning is a scholarly research book that explores current strategies for foreign language learning through the use of technology and introduces new technological tools and evaluates existing ones that foster language development. Highlighting a wide array of topics such as gamification, mobile technologies, and virtual reality, this book is essential for language educators, educational software developers, IT consultants, K-20 institutions, principals, professionals, academicians, researchers, curriculum designers, and students.

The Acquisition of French in Multilingual Contexts Pedro Guijarro-Fuentes, Katrin Schmitz, Natascha Müller, 2015-11-23 This volume brings together new research from different theoretical paradigms addressing the acquisition of French. It focuses on the acquisition of French in combination with English, German, Russian or Spanish and enriches our understanding of the particularities of French and the role of language combinations in the acquisition process. The chapters examine the development of different grammatical aspects (word order phenomena, adjective placement, dislocation and cleft constructions, wh-questions, DP phenomena, argument omissions and constructions with particular word groups) and use various methodologies (such as elicitation tasks, longitudinal studies and parsing experiments) to further add to our understanding of how French is acquired in different contexts. This book will be a resource for researchers and graduate students working in the discipline of language acquisition, especially those who are interested in language contact phenomena where two typologically different languages are involved.
