

The Giza Power Plant Technologies Of Ancient Egypt

Christopher Dunn

Scott Creighton

The Giza Power Plant Christopher Dunn, 1998-08-01 Did a highly advanced civilization exist in prehistory? Is the Giza Pyramid a remnant of their technology? Then, what was the power source that fueled such a civilization? The technology of harmonic resonance, claims renowned master craftsman and engineer Christopher Dunn. In a brilliant piece of reverse engineering based on twenty years of research, Dunn reveals that the Great Pyramid of Giza was actually a large acoustical device! By its size and dimensions, this crystal edifice created a harmonic resonance with the Earth and converted Earth's vibrational energies to microwave radiation. The author shows how the pyramid's numerous chambers and passageways were positioned with the deliberate precision to maximize its acoustical qualities. This may be the same technology discovered by Nikola Tesla and the solution to our own clean energy needs.

Lost Technologies of Ancient Egypt Christopher Dunn, 2010-06-24 A unique study of the engineering and tools used to create Egyptian monuments • Presents a stone-by-stone analysis of key Egyptian monuments, including the statues of Ramses II and the tunnels of the Serapeum • Reveals that highly refined tools and mega-machines were used in ancient Egypt From the pyramids in the north to the temples in the south, ancient artisans left their marks all over Egypt, unique marks that reveal craftsmanship we would be hard pressed to duplicate today. Drawing together the results of more than 30 years of research and nine field study journeys to Egypt, Christopher Dunn presents a stunning stone-by-stone analysis of key Egyptian monuments, including the statue of Ramses II at Luxor and the fallen crowns that lay at its feet. His modern-day engineering expertise provides a unique view into the sophisticated technology used to create these famous monuments in prehistoric times. Using modern digital photography, computer-aided design software, and metrology instruments, Dunn exposes the extreme precision of these monuments and the type of advanced manufacturing expertise necessary to produce them. His computer analysis of the statues of Ramses II reveals that the left and right sides of the faces are precise mirror images of each other, and his examination of the mysterious underground tunnels of the Serapeum illuminates the finest examples of precision engineering on the planet. Providing never-before-seen evidence in the form of more than 280 photographs, Dunn's research shows that while absent from the archaeological record, highly refined tools, techniques, and

even mega-machines must have been used in ancient Egypt.

The Spiritual Technology of Ancient Egypt Edward F. Malkowski, 2007-10-03 How ancient Egyptians understood quantum theory • Investigates the history of how modern religion and the Age of Science were inspired by the sacred science of the ancients • Examines how quantum theory explains that the cosmos arises from consciousness • Reveals the unanimity between Schwaller de Lubicz's "sacred science" and the science of a cosmos governed by quantum mechanics Since the dawn of the Age of Science humankind has been engaged in a methodical quest to understand the cosmos. With the development of quantum mechanics, the notion that everything is solid matter is being replaced with the idea that information or "thought" may be the true source of physical reality. Such scientific inquiry has led to a growing interest in the brain's unique and mysterious ability to create perception, possibly through quantum interactions. Consciousness is now being considered as much a fundamental part of reality as the three dimensions we are so familiar with. Although this direction in scientific thought is seen as a new approach, the secret wisdom of the ancients presented just such a view thousands of years ago. Building on René A. Schwaller de Lubicz's systematic study of Luxor's Temple of Amun-Mut-Khonsu during the 1940s and '50s, Edward Malkowski shows that the ancient Egyptians' worldview was not based on superstition or the invention of myth but was the result of direct observation using critical faculties attuned to the quantum manifestation of the universe. This understanding of reality as a product of human consciousness provided the inspiration for the sacred science of the ancients--precisely the philosophy modern science is embracing today. In the philosophical tradition of Schwaller de Lubicz, *The Spiritual Technology of Ancient Egypt* investigates the technical and religious legacy of ancient Egypt to reveal its congruence with today's "New Science."

Giza: The Tesla Connection Christopher Dunn, 2024-01-30 Reveals how the pyramids of Egypt were sophisticated generators of clean energy • Explains how the pyramids harmonized seismic energy, which enabled the harvesting of electricity and the mitigation of earthquakes • Shares recent cutting-edge research on earthquake lights, acoustic frequency measurements and energy concentration within the Great Pyramid, the shafts of the Queen's Chamber, the scorch marks that support the King's Chamber explosion hypothesis, and the significance of the large void above the Grand Gallery • Includes technical appendices written by experts and top researchers Sharing extensive new evidence and cutting-edge research that the Great Pyramid at Giza was built as an energy-harvesting machine, Christopher Dunn details how the ancient Egyptians were generating clean power for their civilization and reveals how the pyramid builders and the great inventor Nikola Tesla were drawing from the same universal knowledge. Looking at each part of the Great Pyramid, from the internal chambers to its massive stone blocks to the pyramidion on top, Dunn reveals how the pyramids in Egypt served to stimulate the release and collection of electrons in the Earth's crust by harmonizing seismic energy while also attenuating the accumulating stresses. Drawing on exhaustive ongoing research by NASA scientists into the phenomenon known as "earthquake lights,"

the author shows how the pyramid builders were inspired by this phenomenon and learned to stress igneous rocks similar to tectonic plate movement in order to harvest the resulting electron flow, which also enabled the pyramids to mitigate any impending earthquakes. He looks in depth at recent research that supports the pyramid energy theory, including new explorations of the shafts of the Queen's Chamber, Russian research on how the Great Pyramid can concentrate electromagnetic energy, and analysis of the scorch marks on the ceiling of the Grand Gallery, which supports the King's Chamber explosion hypothesis. He also examines the stunning significance of the large void above the Grand Gallery discovered in 2017. Analyzing the results of extensive acoustic testing and measurements related to specific frequencies within the Great Pyramid, Dunn looks at the vibration and frequency rates found at ancient sacred sites and shows how the pyramids were tuned to the Earth's frequency. He also includes multiple technical appendices written by experts. While the pyramids' sophisticated energy-harvesting abilities are now in disarray and disuse, some remnants of their technologies are still there, waiting to be rediscovered and provide our civilization with an abundance of non-polluting power.

The Giza Death Star Joseph P. Farrell,2001 This is physicist Joseph Farrell's amazing book on the secrets of the Great Pyramid of Giza. Among the topics discussed in detail in this fantastic book are: An Archaeology of Mass Destruction, Theories and Theories; The Machine Hypothesis; Pythagoras, Plato, Planck, and the Pyramid; The Weapon Hypothesis; Encoded Harmonics of the Planck Units in the Great Pyramid; The Grand Gallery and its Crystals: Gravito-acoustic Resonators; The Other Two Large Pyramids, the 'Causeways', and the 'Temples'. Also: A Phase Conjugate Howitzer Evidence of the Use of Weapons of Mass Destruction in Ancient Times; High Frequency Direct Current 'Impulse' Technology; How the Giza Death Star worked. This book takes off where Christopher Dunn's 'The Giza Power Plant' left off. It is a rollicking ride into the world of fantastic science and an even more fantastic past that is just beginning to be imagined!

The Land of Osiris Stephen S. Mehler,2002-03 Was there an advanced prehistoric civilization in ancient Egypt? Who were the people who built the great pyramids and carved the Great Sphinx? Did the pyramids serve as energy devices and not as tombs for kings? Independent Egyptologist Stephen S. Mehler has spent over 30 years researching the answers to these questions and believes the answers are Yes! An indigenous oral tradition still exists in Egypt, and Mehler has been able to uncover and study it with the help of a living master of this tradition, Abd1El Hakim Awan. He has also been given permission to share these teachings—presented heretofore in fragments by other researchers—to the Western World, teachings that unfold a whole new understanding of ancient Egypt--Publisher's description.

Ancient Egypt 39,000 BCE Edward F. Malkowski,2010-05-14 A view into the sophisticated and highly advanced civilization that preceded the world of the pharaohs • Presents historical evidence of the civilization ruled by the “gods” that the Egyptians claimed preceded their own • Explains who these prehistoric people were, what happened to them, and why they built a series of pyramids along the west bank of the Nile River Traditional Egyptologists have long resisted the notion

that the architectural achievements of the Ancient Egyptians required the existence of a much more sophisticated technology than would have existed at that time. Yet, no records exist explaining how, why, or who built Egypt's megalithic monuments and statues. The ancient Egyptians did, however, record that their civilization resided in the shadow of a kingdom of "gods" whose reign ended many thousands of years before their first dynasty. What was this Civilization X that antiquity's most accomplished people revered as gods? The recent discovery of a large stone at one of Egypt's oldest ruins presents physical evidence that clearly and distinctly shows the markings of a machining process far beyond the capabilities of the Ancient Egyptians. Likewise, experimental modeling of the Great Pyramid's subterranean chambers and passageways gives scientific evidence to further support the theory that the civilization responsible for such magnificent monuments is much older than presently believed. Ancient Egypt 39,000 BCE examines this evidence from historical and technical points of view, explaining who these prehistoric people were, what happened to them, why they built their civilization out of granite, and why they built a series of pyramids along the west bank of the Nile River.

Secrets of the Great Pyramid Peter Tompkins, Livio Catullo Stecchini, 1973-01-01

Before the Pharaohs Edward F. Malkowski, 2010-04-12 Presents conclusive evidence that ancient Egypt was originally the remnant of an earlier, highly sophisticated civilization • Supports earlier speculations based on myth and esoteric sources with scientific proof from the fields of genetics, engineering, and geology • Provides further proof of the connection between the Mayans and ancient Egyptians • Links the mystery of Cro-Magnon man to the rise and fall of this ancient civilization In the late nineteenth century, French explorer Augustus Le Plongeon, after years of research in Mexico's Yucatán Peninsula, concluded that the Mayan and Egyptian civilizations were related--as remnants of a once greater and highly sophisticated culture. The discoveries of modern researchers over the last two decades now support this once derided speculation with evidence revealing that the Sphinx is thousands of years older than Egyptologists have claimed, that the pyramids were not tombs but geomechanical power plants, and that the megaliths of the Nabta Playa reveal complex astronomical star maps that existed 4,000 years before conventional historians deemed such knowledge possible. Much of the past support for prehistoric civilization has relied on esoteric traditions and mythic narrative. Using hard scientific evidence from the fields of archaeology, genetics, engineering, and geology, as well as sacred and religious texts, Malkowski shows that these mythic narratives are based on actual events and that a highly sophisticated civilization did once exist prior to those of Egypt and Sumer. Tying its cataclysmic fall to the mysterious disappearance of Cro-Magnon culture, Before the Pharaohs offers a compelling new view of humanity's past.

The Giza Death Star Deployed Joseph P. Farrell, 2003 Physicist Joseph Farrell is amazing sequel to 'The Giza Death Star' which takes us from the Great Pyramid of Giza to the asteroid belt and the so-called Pyramids of Mars. Farrell expands on his thesis that the Great Pyramid was a chemical maser, designed as a weapon and eventually deployed with disastrous results

to the solar system. The Great Pyramid as a weapon! Evidence of the Use of Weapons of Mass Destruction in Ancient Times! The Astonishing Technology used in the Giza Death Star! Evidence of a similar Death Star-Pyramid built on Mars! The mystery of the Asteroid Belt solved! Topics in this amazing book include: Exploding Planets: The Movie, the Mirror, and the Model; Dating the Catastrophe and the Compound; A Brief History of the Exoteric and Esoteric Investigations of the Great Pyramid; No Machines, Please!; The Stargate Conspiracy; The Scalar Weapons; Message or Machine?; A Tesla Analysis of the Putative Physics and Engineering of the Giza Death Star; Cohering the Zero Point, Vacuum Energy, Flux: Synopsis of Scalar Physics and Paleophysics; Configuring the Scalar Pulse Wave; Inferred Applications in the Great Pyramid; Quantum Numerology, Feedback Loops and Tetrahedral Physics

Forbidden History J. Douglas Kenyon, 2005-03-29 Challenges the scientific theories on the establishment of civilization and technology • Contains 42 essays by 17 key thinkers in the fields of alternative science and history, including Christopher Dunn, Frank Joseph, Will Hart, Rand Flem-Ath, and Moira Timmes • Edited by Atlantis Rising publisher, J. Douglas Kenyon In *Forbidden History* writer and editor J. Douglas Kenyon has chosen 42 essays that have appeared in the bimonthly journal *Atlantis Rising* to provide readers with an overview of the core positions of key thinkers in the field of ancient mysteries and alternative history. The 17 contributors include among others, Rand Flem-Ath, Frank Joseph, Christopher Dunn, and Will Hart, all of whom challenge the scientific establishment to reexamine its underlying premises in understanding ancient civilizations and open up to the possibility of meaningful debate around alternative theories of humanity's true past. Each of the essays builds upon the work of the other contributors. Kenyon has carefully crafted his vision and selected writings in six areas: Darwinism Under Fire, Earth Changes--Sudden or Gradual, Civilization's Greater Antiquity, Ancestors from Space, Ancient High Tech, and The Search for Lost Origins. He explores the most current ideas in the Atlantis debate, the origins of the Pyramids, and many other controversial themes. The book serves as an excellent introduction to hitherto suppressed and alternative accounts of history as contributors raise questions about the origins of civilization and humanity, catastrophism, and ancient technology. The collection also includes several articles that introduce, compare, contrast, and complement the theories of other notable authors in these fields, such as Zecharia Sitchin, Paul LaViolette, John Michell, and John Anthony West.

Who Built the Moon? Christopher Knight, Alan Butler, 2014-03-11 The authors of *Civilization One* return, bringing new evidence about the Moon that will shake up our world. Christopher Knight and Alan Butler realized that the ancient system of geometry they presented in their earlier, breakthrough study works as perfectly for the Moon as it does the Earth. On further investigation, they found a consistent sequence of beautiful integer numbers when looking at every major aspect of the Moon--no such pattern emerges for any other planet or moon in the solar system. In addition, Knight and Butler discovered

that the Moon possesses few or no heavy metals and has no core—something that should not be possible. Their persuasive conclusion: if higher life only developed on Earth because the Moon is exactly what it is and where it is, it becomes unreasonable to cling to the idea that the Moon is a natural object. The only question that remains is, who built it?

Technology of the Gods David Hatcher Childress,2000 Technology of the Gods lays out the mind-bending evidence that long-lost civilizations had attained and even exceeded our modern level of advancement. Westerners have been taught that humankind has progressed along a straight-line path from the primitive past to the proficient present, but the hard, fast evidence (literally written in stone!) proves that the ancients had technologies we cannot even replicate today.

The Great Pyramid Hoax Scott Creighton,2016-12-15 Reveals how the only hard evidence that dates the Great Pyramid--the quarry marks discovered by Colonel Vyse in 1837--was forged • Includes evidence from the time of the discovery of the marks: Vyse's private field notes, surveys, facsimile drawings, and eye-witness testimony • Explains why Vyse was driven to perpetrate a fraud inside the Great Pyramid • Examines recent chemical analysis of the marks and high-definition photos to reveal errors and other anomalies within the forged Khufu cartouche Despite millennia of fame, the origins of the Great Pyramid of Giza are shrouded in mystery. Believed to be the tomb of an Egyptian king, even though no remains have ever been found, its construction date of roughly 2550 BCE is tied to only one piece of evidence: the crudely painted marks within the pyramid's hidden chambers that refer to the 4th Dynasty king Khufu, discovered in 1837 by Colonel Howard Vyse and his team. Using evidence from the time of the discovery of these "quarry marks"--including surveys, facsimile drawings and Vyse's private field notes--along with high definition photos of the actual marks, Scott Creighton reveals how and why the marks were faked. He investigates the anomalous and contradictory orthography of the quarry marks through more than 75 photos and illustrations, showing how they radically depart from the established canon of quarry marks from this period. He explains how the orientation of the Khufu cartouche contradicts ancient Egyptian writing convention and how one of the signs is from a later period. Analyzing Vyse's private diary, he reveals Vyse's forgery instructions to his two assistants, Raven and Hill, and what the anachronistic sign should have been. He examines recent chemical analysis of the marks along with the eye-witness testimony of Humphries Brewer, who worked with Vyse at Giza in 1837 and saw forgery take place. Exploring Vyse's background, including his electoral fraud to become a member of the British Parliament, he explains why he was driven to perpetrate a fraud inside the Great Pyramid. Proving Zecharia Sitchin's claim that the quarry marks are forgeries and removing the only physical evidence that dates the Great Pyramid's construction to the reign of Khufu, Creighton's study strikes down one of the most fundamental assertions of orthodox Egyptologists and reopens long-standing questions about the Great Pyramid's true age, who really built it, and why.

From Light Into Darkness Stephen Mehler,2014-06-16 Building on the esoteric information first revealed in Land of Osiris, this exciting book presents more of Abd'El Hakim's oral traditions, with radical new interpretations of how religion

evolved in prehistoric and dynastic Khemit, or Egypt. * Have popular modern religions developed out of practices in ancient Egypt? * Did religion in Egypt represent only a shadow of the spiritual practices of prehistoric people? * Have the Western Mystery Schools such as the Rosicrucian Order evolved from these ancient systems? * Author Mehler explores the teachings of the King Akhenaten and the real Moses, the true identity of the Hyksos, and Akhenaten's connections to The Exodus, Judaism and the Rosicrucian Order. Here for the first time in the West, are the spiritual teachings of the ancient Khemitians, the foundation for the coming new cycle of consciousness—The Awakening; more.

Maps of the Ancient Sea Kings Charles H. Hapgood, 1966 Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt. Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century. Hapgood believes that they mapped all the continents. This would mean that the Americas were mapped thousands of years before Columbus. Antarctica would have been mapped when its coasts were free of ice. Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene, Ice Age 'land bridge'.

Black Genesis Robert Bauval, Thomas Brophy, 2011-03-28 Presents proof that an advanced black African civilization inhabited the Sahara long before Pharaonic Egypt • Reveals black Africa to be at the genesis of ancient civilization and the human story • Examines extensive studies into the lost civilization of the “Star People” by renowned anthropologists, archaeologists, genetic scientists, and cultural historians as well as the authors’ archaeoastronomy and hieroglyphics research • Deciphers the history behind the mysterious Nabta Playa ceremonial area and its stone calendar circle and megaliths Relegated to the realm of archaeological heresy, despite a wealth of hard scientific evidence, the theory that an advanced civilization of black Africans settled in the Sahara long before Pharaonic Egypt existed has been dismissed and even condemned by conventional Egyptologists, archaeologists, and the Egyptian government. Uncovering compelling new evidence, Egyptologist Robert Bauval and astrophysicist Thomas Brophy present the anthropological, climatological, archaeological, geological, and genetic research supporting this hugely debated theory of the black African origin of Egyptian civilization. Building upon extensive studies from the past four decades and their own archaeoastronomical and hieroglyphic research, the authors show how the early black culture known as the Cattle People not only domesticated cattle but also had a sophisticated grasp of astronomy; created plentiful rock art at Gilf Kebir and Gebel Uwainat; had trade routes to the Mediterranean coast, central Africa, and the Sinai; held spiritual and occult ceremonies; and constructed a stone calendar circle and megaliths at the ceremonial site of Nabta Playa reminiscent of Stonehenge, yet much older. Revealing these “Star People” as the true founders of ancient Egyptian civilization, this book completely rewrites the history of world civilization, placing black Africa back in its rightful place at the center of mankind’s origins.

Brutality Garden Christopher Dunn, 2001 In the late 1960s, Brazilian artists forged a watershed cultural movement known as Tropicilia. Music inspired by that movement is today enjoying considerable attention at home and abroad. Few new listeners, however, make the connection between this music and the circumstances surrounding its creation, the most violent and repressive days of the military regime that governed Brazil from 1964 to 1985. With key manifestations in theater, cinema, visual arts, literature, and especially popular music, Tropicilia dynamically articulated the conflicts and aspirations of a generation of young, urban Brazilians. Focusing on a group of musicians from Bahia, an impoverished state in northeastern Brazil noted for its vibrant Afro-Brazilian culture, Christopher Dunn reveals how artists including Caetano Veloso, Gilberto Gil, Gal Costa, and Tom Z© created this movement together with the musical and poetic vanguards of Sao Paulo, Brazil's most modern and industrialized city. He shows how the tropicalists selectively appropriated and parodied cultural practices from Brazil and abroad in order to expose the fissure between their nation's idealized image as a peaceful tropical garden and the daily brutality visited upon its citizens.
