Scholars in COVID Times Melissa Castillo Planas, Debra A. Castillo, 2023-09-15 *Scholars in COVID Times* documents the new and innovative forms of scholarship, community collaboration, and teaching brought about by the COVID-19 pandemic. In this volume, Melissa Castillo Planas and Debra A. Castillo bring together a diverse range of texts, from research-based studies to self-reflective essays, to reexamine what it means to be a publicly engaged scholar in the era of COVID. Between social distancing, masking, and remote teaching—along with the devastating physical and emotional tolls on individuals and families—the disruption of COVID-19 in academia has given motivated scholars an opportunity (or necessitated them) to reconsider how they interact with and inspire students, conduct research, and continue collaborative projects. Addressing a broad range of factors, from anti-Asian racism to pedagogies of resilience and escapism, digital pen pals to international performance, the essays are connected by a flexible, creative approach to community engagement as a core aspect of research and teaching. Timely and urgent, but with long-term implications and applications, *Scholars in COVID Times* offers a heterogeneous vision of scholarly and pedagogical innovation in an era of contestation and crisis.

Oedipus the King Sophocles, 2015-12-12 *Oedipus the King* is the first tragic play in Sophocles' classic *Oedipus* trilogy. The play tells the story of a man who eventually becomes the King of Thebes while fulfilling an extremely tragic prophecy.

The Landscape of Historical Memory Kirk A. Denton, 2021-03-01 *The Landscape of Historical Memory* explores the

place of museums and memorial culture in the contestation over historical memory in post-martial law Taiwan. The book is particularly oriented toward the role of politics—especially political parties—in the establishment, administration, architectural design, and historical narratives of museums. It is framed around the wrangling between the “blue camp” (the Nationalist Party, or KMT, and its supporters) and the “green camp” (Democratic Progressive Party, or DPP, and its supporters) over what facets of the past should be remembered and how they should be displayed in museums. Organized into chapters focused on particular types of museums and memorial spaces (such as archaeology museums, history museums, martyrs’ shrines, war museums, memorial halls, literature museums, ethnology museums, and ecomuseums), the book presents a broad overview of the state of museums in Taiwan in the past three decades. The case of Taiwan museums tells us much about Cold War politics and its legacy in East Asia; the role of culture, history, and memory in shaping identities in the “postcolonial” landscape of Taiwan; the politics of historical memory in an emergent democracy, especially in counterpoint to the politics of museums in the People’s Republic of China, which continues to be an authoritarian single party state; and the place of museums in a neoliberal economic climate. “This book offers unique insight into the configurations of international museum culture as manifested in the sociopolitical landscape of post-martial law Taiwan. Using case studies filled with telling details, Denton analyzes how museums both reflect and initiate cultural change. This work adds substantially to Taiwan studies and museology, with in-depth scholarship and innovative observations presented in a clear and compelling narrative.” —Joseph R. Allen, University of Minnesota, Twin Cities “This is a fascinating and meticulously researched survey of Taiwan’s museums. Denton has produced a book that is both scholarly and highly readable. It will appeal to a wide readership, encompassing social scientists specializing in Taiwan, students of Chinese or East Asian studies, observers of Taiwanese politics and the local cultural scene, and others besides.” —Edward Vickers, Kyushu University

Writing Awesome Answers to Comprehension Questions (Even the Hard Ones) Nancy Boyles, 2021-05-04 Help students appreciate texts and write about them with conviction. Responding to a comprehension question is a surprisingly complex task. It draws on multiple skills: students must be able to read and analyze a text passage; consider what aspect of the text the question addresses; and then quickly and concisely write about their ideas, citing evidence to support them. Hence the prominence of constructed-response questions in standardized testing. In this refreshingly clear and upbeat guide, literacy consultant Nancy Boyles gives a step-by-step demonstration of how to help students achieve success with this task—and in the process of unpacking the steps involved, demonstrates how the instruction can inspire teachers’ creativity as well as deepen students’ literacy skills. Filled with ready-to-use scaffolds for every stage of instruction—sets of sample questions, anchor charts, cue cards, answer frames—this is a one-stop resource for teaching students how to organize their thoughts about what they’ve read, and then set them down in writing.

Disillusioned Benjamin Herold, 2024-01-23 Astonishingly important.” —Alex Kotlowitz, *The Atlantic* Through the stories of

five American families, a masterful and timely exploration of how hope, history, and racial denial collide in the suburbs and their schools. Outside Atlanta, a middle-class Black family faces off with a school system seemingly bent on punishing their teenage son. North of Dallas, a conservative white family relocates to an affluent suburban enclave, but can't escape the changes sweeping the country. On Chicago's North Shore, a multiracial mom joins an ultraprogressive challenge to the town's liberal status quo. In Compton, California, whose suburban roots are now barely recognizable, undocumented Hispanic parents place their gifted son's future in the hands of educators at a remarkable elementary school. And outside Pittsburgh, a Black mother moves to the same street where author Benjamin Herold grew up, then confronts the destructive legacy left behind by white families like his. Disillusioned braids these human stories together with penetrating local and national history to reveal a vicious cycle undermining the dreams upon which American suburbia was built. For generations, upwardly mobile white families have extracted opportunity from the nation's heavily subsidized suburbs, then moved on before the bills for maintenance and repair came due, leaving the mostly Black and Brown families who followed to clean up the ensuing mess. But now, sweeping demographic shifts and the dawning realization that endless expansion is no longer feasible are disrupting this pattern, forcing everyday families to confront a truth their communities were designed to avoid: The suburban lifestyle dream is a Ponzi scheme whose unraveling threatens us all. How do we come to terms with this troubled history? How do we build a future in which all children can thrive? Drawing upon his decorated career as an education journalist, Herold explores these pressing debates with expertise and perspective. Then, alongside Bethany Smith—the mother from his old neighborhood, who contributes a powerful epilogue to the book—he offers a hopeful path toward renewal. The result is nothing short of a journalistic masterpiece.

Regulating Gas Liberalization Anton Ming-Zhi Gao, 2010-01-01 La 4e de couverture indique : Along with aviation and telecommunications, the gas supply chain has proved to be one of the paradigmatic factors in the great transformation in regulated industry law that has characterized recent decades. The liberalization in the gas market has taken two primary legal forms: (i) removal of entry barriers in competitive sectors; and (ii) regulation of infrastructure sectors through unbundling (economic separation of competitive and infrastructure sectors), and open access (requiring gas infrastructure owners/operators to allow competitors to access their facilities on commercial terms comparable to those that would apply in a competitive market). This book will focus on the latter legal form. This is the first book to analyze, in a comparative way, the detailed development of the unbundling and open access regimes across three continents. It is the author's contention that these two legal forms should be more widely implemented than they are at present. In each of five substantial chapters - on the United States, Europe, Japan, South Korea, and Taiwan - the author first focuses on the proposed or current laws and industrial practices on service, account, functional, legal and ownership unbundling and independent system operator, and then on those of different open access regimes (mainly including regulated and negotiated third party access), insofar as they

have been developed in each location. Using empirical evidence from Europe, the United States, and Japan that a well-formulated and comprehensive liberalization can bring about more advantages than disadvantages, he shows how well-designed unbundling and open access regimes may accomplish the following : inject much-needed competition into gas exploration, exploitation, import, production, and retailing ; reform and re-regulate non-competitive sectors such as transportation, distribution, and storage ; balance potential conflicts between energy security and competition ; and support interests such as environmental protection, energy rights, safety, and consumer protection. The author attends throughout to the contrasting market situations in countries that rely on importing natural gas by liquefied natural gas tankers (LNG countries), and countries with their natural gas mainly coming from production fields via direct pipelines (PNG countries). Identifying the key legal issues arising from the development of the various unbundling and open access regimes discussed, the book goes on to provide a detailed general legislative framework for gas liberalization that applies especially to LNG countries. The author finds, perhaps surprisingly, that both LNG countries and PNG countries can in fact learn from each other. This book will be a key reference for anyone interested in the legal issues of gas liberalization, and will also provide the international energy community with keen insight into the unbundling and open access regimes in the United States, Europe, Japan, South Korea and Taiwan. Policymakers around the world will discover an excellent framework for launching or improving a gas liberalization scheme.

A Student's Guide to Academic and Professional Writing in Education Katie O. Arosteguy, Alison Bright, Brenda J. Rinard, 2019 This concise handbook helps educators write for the rhetorical situations they will face as students of education, and as preservice and practicing teachers. It provides clear and helpful advice for responding to the varying contexts, audiences, and purposes that arise in four written categories in education: classroom, research, credential, and stakeholder writing. The book moves from academic to professional writing and chapters include a discussion of relevant genres, mentor texts with salient features identified, visual aids, and exercises that ask students to apply their understanding of the concepts. Readers learn about the scholarly and qualitative research processes prevalent in the field of education and are encouraged to use writing to facilitate change that improves teaching and learning conditions. “At the heart of this book is a commitment to the value of teachers’ voices.” —From the Foreword by Mya Poe, director, Writing Program, Northeastern University “This book is one tool to help prospective educators embrace all the writing that is to come.” —Anne Elrod Whitney, Penn State College of Education “The authors know the questions students might ask and the places where they might misstep. The book is supportive, analytical, logically sequenced, clear, and student friendly.” —Tim Dewar, UC Santa Barbara

An Introduction to Human Resource Management Nick Wilton, 2016-04-30 Get 12 months FREE access to an interactive eBook when purchasing the paperback* Reflecting the global nature of the workplace with its use of real world examples and case studies, Nick Wilton's book is not another 'How to' of HRM in practice, but goes beyond the prescriptive approach to the practice of strategic HRM and encourages critical reflection to prepare students for the issues and dilemmas they could face in their careers. Providing an introduction to the management of people in work organizations, it seeks to outline the purpose and operation of HRM activities in the 'real world', whilst situating practice in the context of associated debates and controversies played out in the parallel field of academic study. It adopts a critical perspective on the study and practice of HRM to provide the reader with an understanding not only of the potential for HRM to contribute to both improved organizational performance and individual well-being in the workplace, but also why it very often fails to achieve either of these positive outcomes and suggests that the management of people is not the exclusive preserve of HR specialists, but an area of interest or concern for all organizational actors. The new edition comes packed with features that encourage

readers to engage and relate theory to practice including: - Management skills and attributes boxes outlining the required competencies of line managers and HR practitioners - HR in practice boxes illustrating how HRM theory works in real world practice - Ethical insights presenting ethical considerations for budding practitioners - Global insights highlighting practices around the world - Research insights inviting students to explore further academic research - Case Studies and Examples offering a more in-depth look at HRM across a variety of organizations - A free interactive eBook* featuring author videos, web-links interactive multiple choice questions, free SAGE journal articles, extended case studies and other relevant links, allowing access on the go and encouraging learning and retention whatever the reading or learning style. Aimed at students across the academic spectrum, whether studying on a specialist HRM or CIPD program of study, a generalist business and management programme or studying HRM as part of a programme in an unrelated discipline (such as engineering or humanities). *Interactivity only available through VitalSource eBook included as part of paperback product (ISBN 9781473954199). Access not guaranteed on second-hand copies (as access code may have previously been redeemed).

Supporting Early Career Teachers With Research-Based Practices Wellner, Laurie, Pierce-Friedman, Kathleen, 2021-05-21 Teachers in their first few years of their teaching career require high quality, structured support to begin the journey towards becoming experts. Establishing research-based best practices and working habits set up early career teachers for a fulfilling and successful career. The requirements of teachers are constantly changing, and teachers need to continually adapt their knowledge and practices to fit schools' changing demographics. Having a toolbox of research-based best practices to draw upon can support early career teachers as they move from theory to practical application when the learning curve is the steepest. Strengthening the system of support includes increasing teachers' influence over their day-to-day work and developing positive and supportive cultures of learning. Supporting Early Career Teachers With Research-Based Practices presents both theoretical and practical research to support the conceptual understanding of educational praxis for common areas with which early career educators may require additional expertise or support. This book is intended to be a valuable contribution to the body of literature in the field of education by supplying research-based teaching practices for modern education. Primary topics covered include professional learning, classroom management, student-teacher relationships, teaching diverse students and inclusive educational practices, and teacher self-care strategies. This book is a valuable reference tool for early career teachers of all subject areas and grade levels, school administrators, teacher mentors and guides, education faculty in higher education, educational researchers, curriculum developers, instructional facilitators, practicing teachers, pre-service teachers, professional development coordinators, teacher educators, researchers, academicians, and students interested in teaching practices and support for the early career teacher.

Routledge Handbook of Trends and Issues in Global Tourism Supply and Demand Alastair M. Morrison, Dimitrios Buhalis, 2023-09-25 This Handbook provides a comprehensive overview of trends and issues in the global supply and demand

on tourism. With contributions from 70 authors, this Handbook showcases a diverse range of perspectives with insights from around the globe. It reviews the interactions among trends and issues, and it emphasises the importance of tracking and interpreting these on a global scale. The book is organized into three parts, with Part I focusing on supply-side trends including transport, attractions, culture, heritage tourism, technology, policies, and destination management. Part II critically reviews the external factor trends, including the impact of terrorism, multi-crisis destinations, Generation Z's important contributions to the sector, the regulation of sharing economy platforms and nature tourism in future. Part III focuses on market-led trends such as bleisure, glamping, VFR travel, transformational tourism and new trends in wellness tourism following the post-COVID era. The book also provides predictions for the upcoming decades. This Handbook will be a vital tool for researchers, students, and practitioners in the tourism and hospitality sector to further develop their knowledge and expertise in the field. It examines business and policy implications, offering guidance for developing sustainable competitive advantage.

Global Action for School Libraries Barbara Schultz-Jones, Dianne Oberg, 2022-10-03 This book focuses on inquiry-based teaching, one of the five vital aspects of the instructional work of school librarians identified in the second edition of the IFLA School Library Guidelines (2015). Effective implementation of inquiry-based teaching and learning requires a consistent instructional approach, based on a model of inquiry that is built upon foundations of research and best practice. The book explains the importance and significance of inquiry as a process of learning; outlines the research underpinning this process of learning; describes ways in which models of inquiry have been developed; provides recommendations for implementing the use of such models; and demonstrates how the other core instructional activities of school librarians, such as literacy and reading promotion, media and information literacy instruction, technology integration and professional development of teachers, can be integrated into inquiry. Inquiry-based learning is part of "learning to be a learner," a lifelong pursuit involving finding and using information. Inquiry develops the skills and understandings that learners need in new information environments, whether that be as students in post-secondary institutions, as producers and creators in workplaces, or as citizens in communities. Through inquiry-based teaching, school librarians help students to build the essential skills and understandings needed for dealing with complex learning challenges, including analysis, critical thinking, and problem solving. In this book, special attention is given to the development of students' metacognitive abilities, which are essential to their becoming life-long and life-wide learners.

Developing Safer Online Environments for Children: Tools and Policies for Combatting Cyber Aggression

Management Association, Information Resources,2019-10-25 As the digital world assumes an ever-increasing role in the daily lives of the public, opportunities to engage in crimes increase as well. The prevention of cyber aggression is an ongoing challenge due to its multifaceted nature and the difficulties in realizing effective interventions. The consequences of cyber aggression can range from emotional and psychological distress to death by suicide or homicide. Enduring prevention programs need to be defined and take into consideration that the digital revolution changes the way and the meaning of interpersonal relationships. *Developing Safer Online Environments for Children: Tools and Policies for Combatting Cyber Aggression* explores the effects of cyberbullying and cyberstalking on children and examines solutions that can identify and prevent online harassment through both policy and legislation reform and technological tools. Highlighting a range of topics such as cyberbullying, fake profile identification, and victimization, this publication is an ideal reference source for policymakers, educators, principals, school counsellors, therapists, government officials, politicians, lawmakers, academicians, administrators, and researchers.

This Precarious Moment James L. Garlow,David Barton,2018-09-04 America is at a crisis point, and its future depends on you. In *This Precarious Moment*, Dr. Jim Garlow and evangelical political activist David Barton offer practical solutions to the six problems that plague our nation: racial strife, a massive immigration disaster, failure to understand Israel's role in the world, how to reach millennials for Christ, a misunderstanding of the government's role in religion and culture, and a church that has capitulated to culture. Thankfully, there are steps we can take. Join Garlow and Barton as they equip Christians with the knowledge they need to take on today's challenges during this precarious moment in American history.

Finding Meaning Steven DeLay,2023-10-13 The word nihilism today is everywhere. A staple of common speech ever since its coinage by Friedrich Heinrich Jacobi in the eighteenth century, is there any other term of philosophical provenance more descriptive of our times? *Finding Meaning: Essays on Philosophy, Nihilism, and the Death of God* deepens the longstanding

and ongoing debate about the problem of nihilism. Drawing upon a wide range of philosophical and theological schools, traditions, and figures, the eleven specially commissioned essays by international scholars enrich the discussion of how to meet the challenge of nihilism. Fundamental problems and topics include the existence of God, the origins and status of morality, the nature and meaning of history, the relation between reason and faith, the status and role of philosophical knowledge, the place of art and religion in society, the future of modernity, the nature of postmodernity, the perils of technology, the specter of transhumanism, and the history of philosophy from Augustine to Kant and Hegel, Nietzsche to Kierkegaard and Dostoevsky, and Heidegger to Sartre and Camus. Based on a popular series of online essays published at London artist and philosopher Richard Marshall's 3:16 AM, *Finding Meaning* is essential reading for students and scholars of philosophy and theology, and for anyone with a genuine interest in making sense of what it means to be human in an age of nihilism.

HL 121 - The resilience of the Electricity System The Stationery Office, 2015 Modern society is vitally dependent on a reliable supply of electricity and a sustained failure in the electricity system would have dramatic consequences. It would result in a catastrophic failure of communications and of many services on which the country now heavily depends. It would have an impact on the country's economy and on public safety to a much greater extent than even a decade ago. It would take an improbable concatenation of events to put the lights out nationally. National Grid has tools at its disposal to increase capacity or reduce demand, and the Committee are confident that it has the ability to maintain national electricity supply. The National Grid procured extra capacity to raise the capacity margin from 4.1% to 6.1% this winter and guard against a potential shortage of electricity. It is a matter for concern, however, that this extra capacity was put in place at short notice, at considerable cost, and in a way which conflicts with the decarbonisation agenda. The electricity market is now a managed market. The pursuit of decarbonisation makes a free market in electricity supply impossible while low-carbon sources of power are more costly than high-carbon ones. The Committee do not think that the Government has sufficiently informed the public that, with the present and foreseeable state of technology, it is not possible for the electricity supply to be low-cost, resilient and low-carbon all at the same time
