Resources for the Future

Our Natural Resources Jennifer Prior, 2014-07-25 Teach students the importance of conserving Earth's natural resources. Students will learn about wind power, solar power, recycling, renewable and non-renewable resources, and more! Colorful images, supporting text, a glossary, table of contents, and index all work together to help readers better understand the content and be fully engaged from cover to cover. This informative, colorful book uses primary sources to captivate readers as they learn social studies topics.

Managing Natural Resources for Development in Africa Washington Odongo Ochola, P. C. Sanginga, Isaac Bekalo, 2010 The complex and dynamic interlinks between natural resource management (NRM) and development have long been recognized by national and international research and development organizations and have generated voluminous literature. However, much of what is available in the form of university course books, practical learning manuals and reference materials in NRM is based on experiences from outside Africa. Managing Natural Resources for Development in Africa: A Resource Book provides an understanding of the various levels at which NRM issues occur and are being addressed scientifically, economically, socially and politically. The book's nine chapters present state-of-the-art perspectives within a holistic African context. The book systematically navigates the tricky landscape of integrated NRM, with special reference to Eastern and Southern Africa, against the backdrop of prevailing local, national, regional and global social, economic and environmental challenges. The authors' wide experience, the rich references made to emerging challenges and opportunities, and the presentation of different tools, principles, approaches, case studies and processes make the book a rich and valuable one-stop resource for postgraduate students, researchers, policymakers and NRM practitioners. The book is designed to help the reader grasp in-depth NRM perspectives and presents innovative guidance for research design and problem solving, including review questions, learning activities and recommended further reading. The book was developed through a writeshop process by a multi-disciplinary team of lecturers from the University of Nairobi, Egerton University, Kenyatta University, the University of Zimbabwe, the University of Malawi, Makerere University and the University of Dar es Salam. In addition, selected NRM experts from regional and international research organizations including the World Agroforestry Center (ICRAF), the Africa Forest Forum, RUFORUM, IIRR and the International Development Research Centre (IDRC) participated in the writeshop and contributed material to the book.

Earth's Natural Resources John V. Walther, John Walther, 2014 *Earth's Natural Resources* provides a thorough overview of the subject and details how natural resources relate to individuals and our society. It discusses how the Earth's natural resources form and change over time, how they are extracted for human use, and how we can continue to sustainably use them with our ever-growing global population. The text begins with the basics of energy-giving resources such as oil, natural gas, and coal, as well as alternative energy sources and nuclear power. It goes on to cover the earth's abundant and scarce metals, followed by elements used in agriculture, water and its distribution, quality, and usage. The final section highlights soil composition, minerals, and degradation. In each section, the author discusses the science of the element under consideration, as well as any environmental and sustainability concerns that have arisen as humans have harvested the resources with increasing effectiveness. Key Features of *Earth's Natural Resources*: -Provides a thorough overview of our natural resources and how society affects these resources -Includes material on alternative energy sources -End-of-chapter material includes chapter summaries, key term listing, student problems, and reference for further reading -Instructor resources include: PowerPoint Image Bank, PowerPoint Lecture Slides, answers to end of chapter problems

Resource Wars Michael Klare, 2002 Klare argues that wars in the near future will be fought over the control of dwindling natural resources like oil and water.

Natural Resources Law Christine A. Klein, Federico Cheever, Bret C. Birdsong, Alexandra B. Klass, Eric Biber, 2018-02-01 Offering broad national coverage on an array of topics, *Natural Resources Law, Fourth Edition* conveys the drama behind resource disputes and policy and the love-of-place. Most cases are introduced with a photo or map of the place, along with a context-setting paragraph. Each group of cases—both foundational cases as well as new decisions—begins with a factually rich discussion problem tailored to the cases that follow. Many problems mirror traditional essay exam questions; others raise contemporary policy issues. This highly teachable book groups readings into discrete, assignment-sized chunks of 25-40 pages, allowing coverage of 2-4 cases or one problem during each class section. The main emphasis is on primary sources, and each chapter opens with relevant statutory and regulatory sections.

Our Resources William B. Rice, 2015-07-20 This high-interest nonfiction reader will help students gain science content knowledge while building their literacy skills and reading comprehension. This appropriately leveled text features hands-on, simple science experiments and full-color images and graphics. Fourth grade students will learn all about renewable and non-renewable resources through this engaging text that supports STEM education and is aligned to the Next Generation Science Standards.

The Welcoming Classroom Johnna Darragh Ernst, 2014 Engaged families make a difference in the lives of their children!

The children in today's early childhood classroom are more culturally, linguistically, and ability diverse than ever. As a teacher, your challenge is to partner with each family through recognizing their individual strengths, concerns, priorities, and resources. In *The Welcoming Classroom: Building Strong Home-to-School Connections for Early Learning*, Dr. Johnna Darragh Ernst offers practical ideas for creating a welcoming atmosphere for families that will encourage them to participate in their children's learning community. Learn practical ways to connect with families from varied cultural and language backgrounds and abilities. Gain new strategies for creating a home-school link to support learning. Create a richer learning environment by integrating unique family cultural perspectives. Learn ways to encourage family participation in decision making. Learn strategies to develop families as resources. Communicate the message that all families are valued members of the learning community. From improving children's school readiness to encouraging positive engagement with peers, promoting student academic achievement, increasing graduation rates, and helping reduce the negative impact of poverty, the benefits of engaging families early will impact the young children in your care long after they leave your classroom! Johnna Darragh Ernst, PhD, is a professor of early childhood education at Heartland Community College in Normal, Illinois. She specializes in helping early childhood professionals connect with families to create inclusive early childhood classroom communities.

Resources for College Libraries Marcus Elmore,2006 This seven-volume set offers a core collection of hand-selected titles in 58 curriculum-specific subject areas. Volumes are organized into broad subject areas such as Humanities, Languages and Literature, History, Social Sciences and Professional Studies, Science and Technology, and Interdisciplinary and Area Studies. The seventh volume provides helpful cross-referencing indexes which explain the relationship between RCL subject taxonomy and LC ranges. New to this edition are the inclusion of interdisciplinary subject areas and the selection of electronic resources and web sites essential for undergraduate library collections. Non-book selections will be easily identified by a graphic indicator included in the item record. All selections will be assigned an audience level marker indicating whether the title is most appropriate for lower-division undergraduate, upper-division undergraduate, faculty, or general readership. Records will also include a notation if they previously appeared in BCL3 (Books for College Libraries, 1988) or have been reviewed by Choice.

The Resource Curse Syed Mansoob Murshed,2018 The resource curse, or paradox of plenty, refers to the long-

established notion central in development economics that countries rich in natural resources, particularly minerals and fuels, perform less well economically than countries with fewer natural resources. In other words, resources are an economic curse rather than a blessing. This short primer explores the complexities of this idea and the debates that surround it, in particular under what conditions the resource curse might operate, if not universal. Discussion ranges over the nature of resource booms, the benefits and costs of export-led growth, the problems of deindustrialization and manufacturing base erosion, rent-seeking behavior and corruption, and the empirical evidence of the effects of natural resource dependence on growth. The treatment is nontechnical and accessible, drawing throughout on a range of illustrative examples from across the developed and developing world. The Resource Curse offers an authoritative introduction to one of the most perplexing issues of economic growth.
